New AOTA-AOTF Occupational Therapy Researcher Database

You are invited by AOTA and AOTF to add your research projects to the new occupational therapy researcher database.

Who should submit?

Researchers who have completed projects or who are currently implementing a study related to occupational therapy (funded and non-funded). Doctoral students are welcome to submit their dissertation projects.

Why should you submit?

For advocacy of policies and reimbursement, writing public comments, and advancing practice, AOTA needs to know the researchers and their projects (related clinical populations, practice settings, funder - if applicable, ICF level, and type of research). This database will also inform us about the profession's research capacity.

Who will have access to this database?

Only AOTA staff have access to this database. If members would like to know who else is researching in their area, they can contact AOTA's Director of Research (slin@aota.org) .

What type of research is appropriate for the database?

We accept all forms of research, but are especially interested in funded research projects (e.g., federal, state, foundation, etc.).

How to submit research projects?

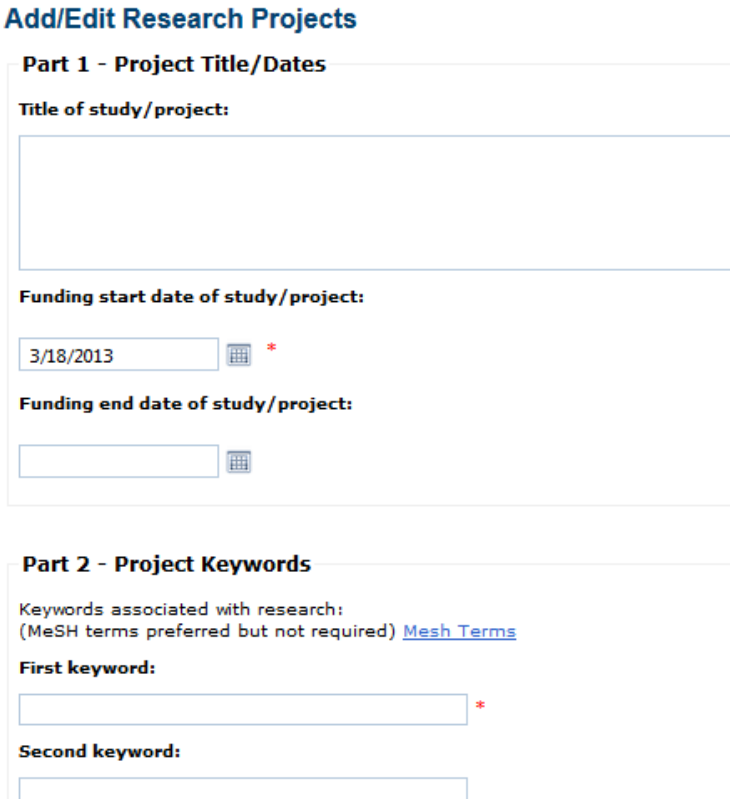
You may enter your research projects at http://myaota.aota.org/research//

or someone else (e.g., assistant) can enter it for you in 5 easy steps.

How to Add Your Project to the OT Researcher Database

1. Go to http://myaota.aota.org/research/ and create a profile.

2. Enter the study's title, dates, and keywords.



3. If applicable, enter the funder's information (NIH, other federal funder, or non-federally funded).

Part 3 - Project Funding

If NIH funded, which division:

- Select -

NIH grant #:
(Example: 5 R01 HL123451)

Award amount:
(If subcontract, list partial awared amount)

Total direct costs:

If federally funded but non-NIH, please indicate:

- Select -

Federal grant #:

Award amount:

4. Enter the Principal Investigator's name and clinical relevance (diagnoses, ages, settings).

5. Enter the applicable ICF levels and relevant category of the AOTA-AOTF Research Agenda. Click Save and wait. To add additional projects you can skip the profile step and click on Add Project.

We sincerely appreciate your help to build a complete occupational therapy researcher database.
