Screening Adult Neurologic Populations: A Step-by-Step Instruction Manual

By Sharon A. Gutman, PhD, OTR/L,
and Alison B. Schonfeld, OTR/L

Compiles the most common occupational therapy screening methods used with adults. Screening forms correspond to the step-by-step screening procedures.

SECTION HIGHLIGHTS

- Cognitive Screening
- Functional Visual Screening
- Perceptual Screening
- Sensory Screening
- Motor Screening
- Cerebellar and Basal Ganglia Function Screening
- Cranial Nerve Function Screening
- Neuropathy and Peripheral Nerve Functioning Screening
- Dysphagia Screening (by Diedre T. Crowley, OTR/L)

“This unique resource . . . is comprehensive, clearly organized, up-to-date, and user-friendly. All OT practitioners working in . . . neurorhabilitation should have this text. In addition, both educators and students will find it invaluable for neural science classes.”
—Glen Gillen, MPA, OTR, BCN, *College of Physicians and Surgeons, Columbia University, New York*

ISBN-13: 978-1-56900-140-0, ISBN-10: 1-56900-140-5, 277 pages, 2003
Order #1226-ARF
AOTA Members: \$55, Nonmembers: \$79

Geriatric Issues in Occupational Therapy: A Compendium of Leading Research

Edited by Mary A. Corcoran, PhD, OTR/L, FAOTA

Features research from the American Journal of Occupational Therapy in one easy reference and covers topics such as dementia, stroke, older drivers, hand strength, visual and functional impairments, self-care, and well elderly issues.

ISBN-13: 978-1-56900-188-2, ISBN-10: 1-56900-188-X, 279 pages, 2003
Order #1108-ARF
AOTA Members: \$39, Nonmembers: \$55

Cognition and Occupation Across the Life Span: Models for Intervention in Occupational Therapy, 2nd Edition

Edited by Noomi Katz, PhD, OTR
Foreword by M. Carolyn Baum, PhD, OTR, FAOTA

Updated and expanded edition provides an extensive knowledge base covering the contribution of occupational therapy for children, adolescents, adults, and older adults with cognitive and related difficulties. This new text incorporates the concepts of the International Classification of Functioning, Disability, and Health and the Occupational Therapy Practice Framework; features a new section describing models of cognition developed and applied to children; focus-

es on different client populations, such as those with neurological disabilities and mental health issues; and more.

SECTION HIGHLIGHTS

- Introduction—1 chapter discusses higher level cognitive functions.
- Neurological Disabilities—4 chapters discuss the dynamic interactional model in cognitive rehabilitation, the quadraphonic approach with brain injury, a retraining model for neurological dysfunctions, and the neuro-functional approach to severe brain injury.
- Mental Health—3 chapters discuss the dynamic interactional model with schizophrenia, the cognitive-behavioral model in mental health, and a nonlinear approach to cognition.
- Pediatrics—3 chapters discuss cognitive coordination and children with developmental coordination disorder, the dynamic interactional model with children with learning disabilities and traumatic brain injury, and cognitive rehabilitation of children with ADHD.
- Healthy Elderly People and Those With Dementia—3 chapters discuss information processing and memory, cognitive aging, and dementia.
- All Populations—1 chapter discusses a dynamic model for cognitive modifiability.

Each model described in this book includes a theoretical base; intervention-evaluation procedures, assessment instruments, and treatment methods; case studies and group treatment illustrating the intervention process; and evidence-based practice methods using all or parts of the model.

Occupational Therapy and Dementia Care: The Home Environmental Skill- Building Program for Individuals and Families (With CD-ROM)

By Laura N. Gitlin, PhD,
and Mary A. Corcoran, PhD, OTR/L, FAOTA

Examine a new approach for supporting people with dementia and their families in managing the disease and maximizing their quality of life. This book, based on the editors' more than 15 years of systematic research on the role of occupational therapy in helping families manage dementia care at home, presents an evidence-based intervention that can be implemented by occupational therapists in home care or other settings such as assisted living and can be used in consultation with other health care and human services professionals. A CD-ROM contains screening indicators and questions, checklists, assessment forms, and treatment receipt forms.

SECTION HIGHLIGHTS

- The Research Evidence—2 chapters
- Essentials of Dementia and Caregiving—2 chapters
- Fundamentals of the Intervention—5 chapters
- Practicalities of Implementing the Program—3 chapters
- Appendixes—sample environmental strategies, resources, assessment tools, references, and checklist for referral to occupational therapy.
