

Create outcomes database

Link research, education, and practice

The profession is science-driven & evidence-based

AOTA has a national database for occupational therapy outcomes by 2011

Competencies in using outcome measures and interpreting/applying outcomes data are incorporated into occupational therapy education curriculum and standards by 2013

Promote dissemination of evidence-based knowledge

Link research, education, and practice

The profession is science-driven & evidence-based

Evidence is being used to support areas of practice to external decision makers (policy, reimbursement, licensure, ethics)

Evidence is incorporated into the blueprint for education
