

## Adults With Neurodegenerative Diseases (OTA Practice Guidelines)

BY SUSAN J. FORWELL, PHD, OT(C), FCAOT

Using evidence-based perspective and key concepts from the *Occupational Therapy Practice Framework*, this guideline provides an overview of the occupational therapy process for people with neurodegenerative diseases. It defines that process and the nature, frequency, and duration of intervention that occurs within the boundaries of acceptable practice with clients with multiple sclerosis, amyotrophic lateral sclerosis, and Parkinson's disease.

### HIGHLIGHTS

- Introduction
- Occupational Therapy for Adults With Neurodegenerative Diseases
- Evidence-Based Practice
- Appendixes—Include selected *ICD-9-CM* and *CPT™* codes as well as medical and epidemiological aspects

## Compensating for Memory Deficits Using a Systematic Approach

BY SUSAN K. KIME, OTR/L

FOREWORDS BY BARBARA A. WILSON, PHD,  
AND BY GEORGE PRIGATANO, PHD

CD-ROM

Difficulty with memory is a common cognitive deficit experienced by people following a brain injury. The degree to which a client is able to compensate for memory deficits often defines his or her capability to function at work, at home, and socially.

This book focuses on the implementation of external memory aids to help clients compensate for memory deficits, specifically personal organizers, calendars, watches, checklists, and so forth. It helps therapists define and implement a successful approach using these methods. A CD-ROM includes sample forms and checklists.
