## Activity Card Sort, 2nd Edition

BY CAROLYN M. BAUM, PHD, OTR/L,  
FAOTA, AND DOROTHY EDWARDS, PHD  
PHOTOGRAPHY BY MADELAINE GRAY,  
MA, MPA, OT, AND STEPHANIE CORDEL

*Activity Card Sort, 2nd Edition* (ACS) is a flexible and useful measure of occupation that enables occupational therapy practitioners to help clients describe their instrumental, leisure, and social activities. The format—89 photographs of individuals performing activities and 3 versions of the instrument (Institutional, Recovering, and Community Living)—is easily understood and administered. Using ACS will give clinicians the occupational history and information they need to help clients build routines of meaningful and healthy activities. Includes 20 instrumental activities, 35 low-physical-demand leisure activities, 17 high-physical-demand leisure activities, and 17 social activities and allows for the calculation of the percentage of activity retained.

### ACS HIGHLIGHTS

- Test description and methodology
- Administration and scoring directions
- Test development, validation, and reliability
- Examples of test utility
- References
- Easy-to-use sample forms (available on CD-ROM)

## Occupational Therapy Assessment Tools: An Annotated Index, 3rd Edition

EDITED BY INA ELFANT ASHER, MS, OTR/L

CD-ROM

Nearly 400 instruments are reviewed in this third edition of *Occupational Therapy Assessment Tools*, including many developed by occupational therapists. An international team of academicians, clinicians, researchers, and advanced-degree candidates working in various practice arenas collaborated on this update. The assessment profiles—which include title, authors, format, purpose, population, time required to administer, setting or position, materials or tools, brief description, interpretation, reliability and validity, source, additional references, cost, and sample—will be useful to clinicians and students, who must choose appropriate tools for clinical practice; to educators, who select assessment procedures for the classroom; and to researchers, who will find instruments that are designed for research purposes or will benefit from further investigation.

Another major change in this new edition is the incorporation of the language, terminology, and organization of the *Occupational Therapy Practice Framework*. Other improvements include a matrix of all assessments, showing content areas and age ranges of each instrument. Most exciting is the accompanying searchable CD-ROM, which offers readers quick, easy access to the entire text.

**INTERNATIONAL PERSPECTIVE!****Canadian Occupational Performance Measure, 4th Edition Manual**

BY MARY LAW, SUE BAPTISTE, ANNE CARSWELL, MARY ANN MCCOLL, HELENE POLATAJKO, AND NANCY POLLOCK

An individualized, client-centered measure designed for use by occupational therapists to detect change in a client's self-perception of occupational performance over time. Developed as an outcome measure for clients with various disabilities and across all developmental stages, the COPM has undergone extensive research in many occupational therapy practice situations. Easy to administer in 20–40 minutes.

**Research on the Canadian Occupational Performance Measure (COPM): An Annotated Resource**

BY MARY ANN MCCOLL, ANNE CARSWELL, MARY LAW, NANCY POLLOCK, SUE BAPTISTE, AND HELENE POLATAJKO

The COPM, initially published in 1991, has been translated into 24 languages and used in more than 35 countries. This resource summarizes the research that has been conducted since that initial publication, with annotations for each article that focus on results and implications for using the measure in research and practice. This practical tool for clinicians, educators, students, and researchers includes additional references; a bibliography; and author, subject, and alphabetical indexes.
