Strategies to Advance Gerontology Excellence: Promoting Best Practice in Occupational Therapy

EDITED BY SUSAN COPPOLA, MS, OTR/L, BCG, FAOTA; SHARON J. ELLIOTT, MS, OTR/L, BCG, FAOTA; AND PAMELA E. TOTO, MS, OTR/L, BCG, FAOTA

FOREWORD BY WENDY WOOD, PHD, OTR/L, FAOTA

Gerontology is one of the most rapidly growing practice areas in occupational therapy. *Strategies to Advance Gerontology Excellence* illuminates the aging process from an occupational perspective and showcases the unique expertise of occupational therapy in gerontology. Perhaps the most comprehensive text available on the subject, it focuses on core best practices with older adults and how to approach or prevent problems. It is an exceptional tool in support of the advanced-practice AOTA Board Certification in Gerontology (BCG) and will serve as an outstanding resource for faculty who are developing or revising curricula to prepare graduates for the future.

COMING FALL 2008!

Adults With Stroke (AOTA Practice Guidelines)

BY JOYCE SABARI, PHD, OTR, FAOTA

SERIES EDITOR: DEBORAH LIEBERMAN, MHSA, OTR/L, FAOTA

Each year, as many as 700,000 people in the United States experience a new or recurrent stroke, and many survive. Over a million of those survivors, however, report difficulties related to the functional limitations that can result from this life-changing experience. The new, evidence-based *Adults With Stroke* (AOTA Practice Guidelines) details the significant contribution of occupational therapy in treating adults dealing with these limitations. Appendixes include other valuable resources such as *CPT*TM codes related to occupational therapy for stroke survivors. Practice guidelines can:

- Assist third-party payers in determining medical need for OT
- Define contribution of OT to health and education planning teams
- Inform legislators and employers about OT education, training, and skills
- Establish outcome measures for analyzing the effectiveness of OT intervention
- Assist OT educators in design of appropriate curricula.

AWARD-WINNING CLASSIC!**Lifestyle Redesign:
Implementing the Well
Elderly Program**

EDITED BY DEBORAH R. MANDEL, MA, OTR;
JEANNE M. JACKSON, PHD, OTR; RUTH ZEMKE, PHD,
OTR, FAOTA; LAURIE NELSON, MA, OTR; AND
FLORENCE A. CLARK, PHD, OTR, FAOTA

Integrates the concept of the University of Southern California's landmark Well Elderly Study, which determined that preventive occupational therapy greatly enhances the health and quality of life of independent-living older adults. The text outlines the steps for a successful occupational therapy intervention with a focus on lifestyle redesign and encourages readers to incorporate their own self-reflections as health care providers.

**Occupational Therapy and
Dementia Care: The Home
Environmental Skill-Building
Program for Individuals
and Families**

BY LAURA N. GITLIN, PHD, AND
MARY A. CORCORAN, PHD, OTR/L, FAOTA

CD-ROM

Examine a new approach for supporting people with dementia and their families in managing the disease and maximizing their quality of life. This book, based on the editors' more than 15 years of systematic research on the role of occupational therapy in helping families manage dementia care at home, presents an evidence-based intervention that can be implemented by occupational therapists in home care or other settings such as assisted living, and can be used in consultation with other health care and human services professionals. A CD-ROM contains screening indicators and questions, checklists, assessment forms, and treatment receipt forms.

Stroke Rehabilitation: A Function-Based Approach, 2nd Edition

EDITED BY GLEN GILLEN, MPA, OTR/L,
BCN, AND ANN BURKHARDT, MA, OTR/L,
BCN, FAOTA

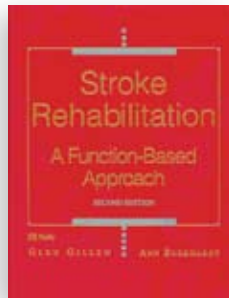

This comprehensive evidence-based text on the occupational therapy management of stroke uses the most up-to-date research on stroke rehabilitation. Presented in a holistic fashion, it combines aspects of background medical information, samples of functionally based evaluations, and treatment techniques and interventions. Includes specific functional aspects of living after stroke, such as driving, sexuality, mobility and gait, and self-care. Features case studies, key terms, objectives, review questions, and a helpful medication chart.
