

## Perspectives for Occupation-Based Practice: Foundation and Future of Occupational Therapy, 2nd Edition

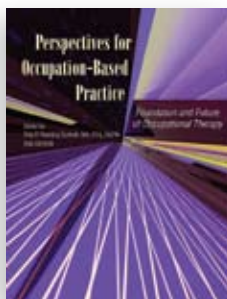

EDITED BY RITA P. FLEMING COTTRELL, MA, OT/L, FAOTA

This revised compilation of the most influential literary works in occupational therapy presents the profession's heritage while addressing current realities and future directions for occupation-based practice. A comprehensive anthology of recognized classics and landmark recent works, it provides essential foundational knowledge about theory and practice. From Meyer's 1922 "Philosophy" to 12 Eleanor Clarke Slagle Lectures to seminal international writings, this text provides a library of the best in the field's literature. Each section provides thought-provoking introductions with study questions.

## Occupational Therapy History: The First 30 Years, 1900 to 1930

BY VIRGINIA A. M. QUIROGA, PHD

FOREWORD BY ROBERT K. BING

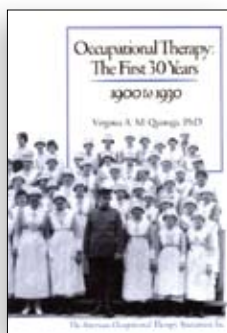

Ever since the occupational therapy profession emerged in the 1910s, it has had to explain itself to the world of medicine and to the public. The word *therapy* seems to have been understood easily; the word *occupation* has been more troublesome. In the early part of the 20th century, with its new focus on science and medicine, many interpreted it to mean "vocational." But to the early occupational therapists it meant more than that. They took a holistic approach to health care, believing that, to achieve good health, a patient had to engage the body, mind, and spirit in the process of healing.

For occupational therapists, today's world parallels that of a century ago. By studying the legacy of experience left by the profession's founders and immediate successors, readers can learn about their creativeness under dire conditions, which produced concepts and ideas that can enlighten us today. This book offers substantial knowledge and inspiration that enhances our competence, understanding, and courage.

## A Professional Legacy: The Eleanor Clarke Slagle Lectures in Occupational Therapy, 1955–2004, 2nd Edition

EDITED BY RENÉ PADILLA, PHD, OTR/L, FAOTA

CONTRIBUTIONS BY YOLANDA GRIFFITHS, OTD, OTR/L, FAOTA; IVELISSE LAZZARINI, OTD, OTR/L; AND CHARLOTTE BRASIC ROYEEN, PHD, OTR, FAOTA

FOREWORD BY SUZANNE M. PELOQUIN, PHD, OTR, FAOTA

The Eleanor Clarke Slagle Lecture is awarded each year to a leader in occupational therapy who has made a significant and long-standing contribution to the profession. Together, these lectures document the evolution of the profession, tracking important history, values, beliefs, wisdoms, and commitments that remain part of the "occupational therapy consciousness" today.

This compilation offers readers an opportunity to discuss, reflect, and affirm their own commitments to the occupational therapy profession by hearing the voices of leaders, mentors, and role models. The lectures are published as they originally were given. Brief introductions to each section place these lectures in historical context both within and outside the profession.

Discussion questions and suggested learning activities further enhance readers' learning. An appendix offers updated biographical sketches of each lecturer.

### SECTION HIGHLIGHTS

- *The 1950s: Launching a New Tradition*
- *The 1960s: Theoretical Flourishing*
