<td>(4) OCCUPATIONAL THERAPY.</td>
</tr>
<tr>
<td></td>
<td>a. The practice of occupational therapy means the therapeutic use of occupations, including everyday life activities with individuals, groups, populations, or organizations to support participation, performance, and function in roles and situations in home, school, workplace, community, and other settings. Occupational therapy services are provided for habilitation, rehabilitation, and the promotion of health and wellness to those who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation, or participation restriction. Occupational therapy addresses the physical, cognitive, psychosocial, sensory-perceptual, and other aspects of performance in a variety of contexts and environments to support engagement in occupations that affect physical and mental health, well-being, and quality of life. The practice of occupational therapy includes:</td>
</tr>
<tr>
<td></td>
<td>1. Evaluation of factors affecting activities of daily living (ADL), instrumental activities of daily living (IADL), rest and sleep, education, work, play, leisure, and social participation including all of the following:</td>
</tr>
<tr>
<td></td>
<td>(i) Client factors, including body functions, such as neuromusculoskeletal, sensory-perceptual, visual, mental, cognitive, and pain factors; body structures such as cardiovascular, digestive, nervous, integumentary, genitourinary systems, and structures related to movement; values, beliefs, and spirituality.</td>
</tr>
<tr>
<td></td>
<td>(ii) Habits, routines, roles, rituals, and behavior patterns.</td>
</tr>
<tr>
<td></td>
<td>(iii) Physical and social environments, cultural, personal, temporal, and virtual contexts, and activity demands that affect performance.</td>
</tr>
<tr>
<td></td>
<td>(iv) Performance skills, including motor and praxis, sensory-perceptual, emotional regulation, cognitive, communication, and social skills.</td>
</tr>
<tr>
<td></td>
<td>2. Methods or approaches selected to direct the process of interventions such as:</td>
</tr>
<tr>
<td></td>
<td>(i) Establishment, remediation, or restoration of a skill or ability that has not yet developed, is impaired, or is in decline.</td>
</tr>
<tr>
<td></td>
<td>(ii) Compensation, modification, or adaptation of activity or environment to enhance performance, or to prevent injuries, disorders, or other conditions.</td>
</tr>
<tr>
<td></td>
<td>(iii) Retention and enhancement of skills or abilities without which performance in everyday life activities would decline.</td>
</tr>
<tr>
<td></td>
<td>(iv) Promotion of health and wellness, including the use of self-management strategies, to enable or enhance performance in everyday life activities.</td>
</tr>
<tr>
<td></td>
<td>(v) Prevention of barriers to performance and participation, including injury and disability prevention.</td>
</tr>
<tr>
<td></td>
<td>3. Interventions and procedures to promote or enhance safety and performance in activities of daily living (ADL), instrumental activities of daily living (IADL), rest and sleep, education, work, play, leisure, and social participation including all of the following:</td>
</tr>
<tr>
<td></td>
<td>(i) Therapeutic use of occupations, exercises, and activities.</td>
</tr>
<tr>
<td></td>
<td>(ii) Training in self-care, self-management, health management and maintenance, home management, community/work reintegretion, and school activities and work performance.</td>
</tr>
<tr>
<td></td>
<td>(iii) Development, remediation, or compensation of neuromusculoskeletal, sensory-perceptual, visual, mental, and cognitive functions, pain tolerance and management, and behavioral skills.</td>
</tr>
<tr>
<td></td>
<td>(iv) Therapeutic use of self, including one's personality, insights, perceptions, and judgments, as part of the therapeutic process.</td>
</tr>
<tr>
<td></td>
<td>(v) Education and training of individuals, including family members, caregivers, groups, populations, and others.</td>
</tr>

State Affairs Group
June 2019
Occupational Therapy Profession- Scope of Practice

(vi) Care coordination, case management, and transition services.
(vii) Consultative services to groups, programs, organizations, or communities.
(viii) Modification of environments, including home, work, school, or community, and adaptation of processes, including the application of ergonomic principles.
(ix) Assessment, design, fabrication, application, fitting, and training in seating and positioning, assistive technology, adaptive devices, training in the use of prosthetic devices, orthotic devices, and the design, fabrication and application of selected splints or orthotics.
(x) Assessment, recommendation, and training in techniques to enhance functional mobility, including management of wheelchairs and other mobility devices.
(xi) Low vision rehabilitation when the patient or client is referred by a licensed optometrist, a licensed ophthalmologist, a licensed physician, a licensed assistant to physician acting pursuant to a valid supervisory agreement, or a licensed certified registered nurse practitioner in a collaborative practice agreement with a licensed physician.
(xii) Driver rehabilitation and community mobility.
(xiii) Management of feeding, eating, and swallowing to enable eating and feeding performance.
(xiv) Application of physical agent modalities, and use of a range of specific therapeutic procedures such as wound care management, interventions to enhance sensory-perceptual and cognitive processing, and manual therapy, all to enhance performance skills.
(xv) Facilitating the occupational performance of groups, populations, or organizations through the modification of environments and the adaptation of processes.

b. An occupational therapist or occupational therapy assistant is qualified to perform the above activities for which they have received training and any other activities for which appropriate training or education, or both, has been received. Notwithstanding any other provision of this chapter, no occupational therapy treatment programs to be rendered by an occupational therapist, occupational therapy assistant, or occupational therapy aide shall be initiated without the referral of a licensed physician, a licensed chiropractor, a licensed optometrist, a licensed assistant to a physician acting pursuant to a valid supervisory agreement, or a licensed certified registered nurse practitioner in a collaborative practice agreement with a licensed physician, a licensed psychologist, or a licensed dentist who shall establish a diagnosis of the condition for which the individual will receive occupational therapy services. In cases of long-term or chronic disease, disability, or dysfunction, or any combination of the foregoing, requiring continued occupational therapy services, the person receiving occupational therapy services shall be reevaluated by a licensed physician, a licensed chiropractor, a licensed optometrist, a licensed assistant to a physician acting pursuant to a valid supervisory agreement, a licensed certified registered nurse practitioner in a collaborative practice agreement with a licensed physician, a licensed psychologist, or a licensed dentist at least annually for confirmation or modification of the diagnosis. Occupational therapists performing services that are not related to injury, disease, or illness that are performed in a wellness or community setting for the purposes of enhancing performance in everyday activities are exempt from this referral requirement. Occupational therapists employed by state agencies and those employed by the public schools and colleges of this state who provide screening and rehabilitation services for the educationally related needs of the students are exempt from this referral requirement.

c. Nothing in this chapter shall be construed as giving occupational therapists the authority to examine or diagnose patients or clients for departures from the normal of human eyes, visual systems or their adjacent structures, or to prescribe or modify ophthalmic materials including, but not limited to, spectacles, contacts, or spectacle-mounted low vision devices.

Alaska Statute: Alaska Statutes 08.84.190

(3) “occupational therapy” means, for compensation, the use of purposeful activity, evaluation, treatment, and consultation with human beings whose ability to cope with the tasks of daily living are threatened with, or impaired by developmental deficits, learning disabilities, aging, poverty, cultural differences, physical injury or illness, or psychological and social disabilities to maximize independence, prevent disability, and maintain...
Occupational Therapy Profession - Scope of Practice

health; “occupational therapy” includes
(A) developing daily living, play, leisure, social, and developmental skills;
(B) facilitating perceptual-motor and sensory integrative functioning;
(C) enhancing functional performance, prevocational skills, and work capabilities using specifically designed exercises, therapeutic activities and measure, manual intervention, and appliances;
(D) design, fabrication, and application of splints or selective adaptive equipment;
(E) administering and interpreting standardized and nonstandardized assessments, including sensory, manual muscle, and range of motion assessments, necessary for planning effective treatment; and
(F) adapting environments for the disabled;

Arizona Statute: Arizona Revised Statutes §32-3401

6. "Occupational therapy" means the use of therapeutic activities or modalities to promote engagement in activities with individuals who are limited by physical or cognitive injury or illness, psychosocial dysfunction, developmental or learning disabilities, sensory processing or modulation deficits or the aging process in order to achieve optimum functional performance, maximize independence, prevent disability and maintain health. Occupational therapy includes evaluation, treatment and consultation based on the client's temporal, spiritual and cultural values and needs.

8. "Occupational therapy services" includes the following:
   (a) Developing an intervention and training plan that is based on the occupational therapist's evaluation of the client's occupational history and experiences, including the client's daily living activities, development, activity demands, values and needs.
   (b) Evaluating and facilitating developmental, perceptual-motor, communication, neuromuscular and sensory processing function, psychosocial skills and systemic functioning, including wound, lymphatic and cardiac functioning.
   (c) Enhancing functional achievement, prevocational skills and work capabilities through the use of therapeutic activities and modalities that are based on anatomy, physiology and kinesiology, growth and development, disabilities, technology and analysis of human behavioral and occupational performance.
   (d) Evaluating, designing, fabricating and training the individual in the use of selective orthotics, prosthetics, adaptive devices, assistive technology and durable medical equipment as appropriate.
   (e) Administering and interpreting standardized and nonstandardized tests that are performed within the practice of occupational therapy, including manual muscle, sensory processing, range of motion, cognition, developmental and psychosocial tests.
   (f) Assessing and adapting environments for individuals with disabilities or who are at risk for dysfunction.

Arkansas Statute: Arkansas Code §17-88-102

(5)
(A) “Occupational therapy” means the evaluation and treatment of individuals whose ability to cope with the tasks of living is threatened or impaired by developmental deficits, the aging process, poverty or cultural differences, environmental or sensory deprivation, physical injury or illness, or psychological and social disability.
(B) The treatment utilizes task-oriented activities to prevent or correct physical or emotional deficits or to minimize the disabling effect of these deficits in the life of the individual so that he or she might perform tasks normally performed at his or her stage of development.
(C) Specific occupational therapy techniques include, but are not limited to:
   (i) Instruction in activities of daily living, design, fabrication, application, recommendation, and instruction in the use of selected orthotic or prosthetic devices and other adaptive equipment;
   (ii) Perceptual-motor and sensory integrative activities;
   (iii) The use of specifically designed crafts;
(iv) Exercises to enhance functional performance; and
(v) Prevocational evaluation and treatment.
(D) The techniques are applied in the treatment of individual patients or clients, in groups, or through social systems;

California | Statute: California Business & Professions Code §2570.2 & 2570.3

§2570.2
(j) “Occupational therapy services” means the services of an occupational therapist or the services of an occupational therapy assistant under the appropriate supervision of an occupational therapist.

(l) “Occupational therapy” means the therapeutic use of purposeful and meaningful goal-directed activities (occupations) with individuals, groups, populations, or organizations, to support participation, performance, and function in roles and situations in home, school, workplace, community, and other settings. Occupational therapy services are provided for habilitation, rehabilitation, and the promotion of health and wellness for clients with disability- and nondisability-related needs or to those who have, or are at risk of developing, health conditions that limit activity or cause participation restrictions. Occupational therapy services encompass occupational therapy assessment, treatment, education, and consultation. Occupational therapy addresses the physical, cognitive, psychosocial, sensory-perception and other aspects of performance in a variety of contexts and environments to support engagement in occupations that affect physical and mental health, well-being, and quality of life. Occupational therapy assessment identifies performance abilities and limitations that are necessary for self-maintenance, learning, work, and other similar meaningful activities. Occupational therapy treatment is focused on developing, improving, or restoring functional daily living skills, compensating for and preventing dysfunction, or minimizing disability. Through engagement in everyday activities, occupational therapy promotes mental health by supporting occupational performance in people with, or at risk of experiencing, a range of physical and mental health disorders. Occupational therapy techniques that are used for treatment involve teaching activities of daily living (excluding speech-language skills); designing or fabricating orthotic devices, and applying or training in the use of assistive technology or orthotic and prosthetic devices (excluding gait training). Occupational therapy consultation provides expert advice to enhance function and quality of life. Consultation or treatment may involve modification of tasks or environments to allow an individual to achieve maximum independence. Services are provided individually, in groups, or populations.

(m) “Hand therapy” is the art and science of rehabilitation of the hand, wrist, and forearm requiring comprehensive knowledge of the upper extremity and specialized skills in assessment and treatment to prevent dysfunction, restore function, or reverse the advancement of pathology. This definition is not intended to prevent an occupational therapist practicing hand therapy from providing other occupational therapy services authorized under this act in conjunction with hand therapy.

(n) “Physical agent modalities” means techniques that produce a response in soft tissue through the use of light, water, temperature, sound, or electricity. These techniques are used as adjunctive methods in conjunction with, or in immediate preparation for, occupational therapy services.

2570.3.
(d) An occupational therapist may provide advanced practices if the therapist has the knowledge, skill, and ability to do so and has demonstrated to the satisfaction of the board that he or she has met educational training and competency requirements. These advanced practices include the following:

1. Hand therapy.
2. The use of physical agent modalities.
3. Swallowing assessment, evaluation, or intervention.
(e) An occupational therapist providing hand therapy services shall demonstrate to the satisfaction of the board that he or she has completed
Occupational Therapy Profession - Scope of Practice

An occupational therapist using physical agent modalities shall demonstrate to the satisfaction of the board that he or she has completed education and training in all of the following areas:

1. Anatomy and physiology of muscle, sensory, vascular, and connective tissue in response to the application of physical agent modalities.
2. Principles of chemistry and physics related to the selected modality.
3. Physiological, neurophysiological, and electrophysiological changes that occur as a result of the application of a modality.
4. Guidelines for the preparation of the client, including education about the process and possible outcomes of treatment.
5. Safety rules and precautions related to the selected modality.
7. Characteristics of the equipment, including safe operation, adjustment, indications of malfunction, and care.

Colorado Statute: Colorado Code 12-40.5-103. Definitions

(9) "Occupational therapy" means the therapeutic use of everyday life activities with individuals or groups for the purpose of participation in roles and situations in home, school, workplace, community, and other settings. The practice of occupational therapy includes:

(a) Methods or strategies selected to direct the process of interventions such as:
   (I) Establishment, remediation, or restoration of a skill or ability that has not yet developed or is impaired;
   (II) Compensation, modification, or adaptation of an activity or environment to enhance performance;
   (III) Maintenance and enhancement of capabilities without which performance of everyday life activities would decline;
   (IV) Promotion of health and wellness to enable or enhance performance in everyday life activities; and
   (V) Prevention of barriers to performance, including disability prevention;

(b) Evaluation of factors affecting activities of daily living, instrumental activities of daily living, education, work, play, leisure, and social participation, including:
   (I) Client factors, including body functions such as neuromuscular, sensory, visual, perceptual, and cognitive functions, and body structures such as cardiovascular, digestive, integumentary, and genitourinary systems;
   (II) Habits, routines, roles, and behavior patterns;
   (III) Cultural, physical, environmental, social, and spiritual contexts and activity demands that affect performance; and
   (IV) Performance skills, including motor, process, and communication and interaction skills;

(c) Interventions and procedures to promote or enhance safety and performance in activities of daily living, instrumental activities of daily living, education, work, play, leisure, and social participation, including:
   (I) Therapeutic use of occupations, exercises, and activities;
   (II) Training in self-care, self-management, home management, and community and work reintegration;
   (III) Identification, development, remediation, or compensation of physical, cognitive, neuromuscular, sensory functions, sensory processing, and behavioral skills;
   (IV) Therapeutic use of self, including a person's personality, insights, perceptions, and judgments, as part of the therapeutic

### Regulation: DC Municipal Regulations 6305 (6305.1-6305.3)

**§6305.1**
An occupational therapist shall exercise sound judgment and provide adequate care within the practice when using methods that include but are not exclusive of the following American Occupational Therapy Association (AOTA) standards for the scope of practice:
(a) Establishment, remediation or restoration of skill or ability in a client;
(b) Compensation, modification, or adaptation of activity or environment to enhance performance;
(c) Maintenance and enhancement of capabilities without which performance in everyday life would decline;
(d) Health and wellness promotion to enable or enhance performance in everyday life activities; and
(e) Prevention of barriers to performance, including disability prevention.

**§6305.2**
An occupational therapist shall exercise sound judgment when evaluating factors affecting activities of daily living, instrumental activities of daily living, education, work, play, leisure, and social participation. These factors may include:
(a) Body functions and body structures;
(b) Habits, routines, roles, and behavior patterns;
(c) Cultural, physical, environmental, social, and spiritual contexts and activity demands that affect performance; and
(d) Performance skills including motor, process, and communication or interaction skills.

**§6305.3**
An occupational therapist shall exercise sound judgment and provide adequate care to a client when administering interventions and procedures...

- (N) Application of physical agent modalities and use of a range of specific therapeutic procedures, such as wound care management, interventions to enhance sensory-perceptual and cognitive processing, and manual therapy, to enhance performance skills; and
- (O) Facilitating the occupational performance of groups, populations, or organizations through the modification of environments and the adaptation of processes.

### Idaho Statute: Idaho Code § 54-3702

(10) "Occupational therapy" means the care and services provided by or under the direction and supervision of an occupational therapist.

(13) "Practice of occupational therapy" means the therapeutic use of everyday life activities (occupations) with individuals or groups for the purpose of participation in roles and situations in home, school, workplace, community, and other settings. Occupational therapy services are provided for the purpose of promoting health and wellness and to those who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation, or participation restriction. Occupational therapy addresses the physical, cognitive, psychosocial, sensory, and other aspects of performance in a variety of contexts to support engagement in everyday life activities that affect health, well-being and quality of life. The practice of occupational therapy includes:

(a) Development of occupation-based plans, methods or strategies selected to direct the process of interventions such as:

(i) Establishment, remediation, or restoration of a skill or ability that has not yet developed or is impaired.
(ii) Compensation, modification, or adaptation of activity or environment to enhance performance.
(iii) Maintenance and enhancement of capabilities without which performance in everyday life activities would decline.
(iv) Health promotion and wellness to enable or enhance performance in everyday life activities.
(v) Prevention of barriers to performance, including disability prevention.

(b) Evaluation of factors affecting a client's occupational performance areas of activities of daily living (ADL), instrumental activities of
daily living (IADL), rest and sleep, education, work, play, leisure, and social participation, including:

(i) Client factors, including body functions (such as neuromuscular, sensory, visual, perceptual, cognitive), values, beliefs, and spirituality, and body structures (such as cardiovascular, digestive, integumentary, genitourinary systems).

(ii) Performance patterns, including habits, routines, roles, and behavior patterns.

(iii) Contexts and activity demands that affect performance, including cultural, physical, environmental, social, virtual and temporal.

(iv) Performance skills, including sensory perceptual skills, motor and praxis skills, emotional regulation skills, cognitive skills, communication and social skills.

(c) Interventions and procedures to promote or enhance safety and performance in activities of daily living (ADL), instrumental activities of daily living (IADL), education, work, play, leisure, and social participation, rest and sleep, including:

(i) Therapeutic use of occupations, exercises, and activities.

(ii) Training in self-care, self-management, home management, and community/work reintegration.

(iii) Development, remediation, or compensation of physical, cognitive, neuromuscular, sensory functions and behavioral skills.

(iv) Therapeutic use of self, including one’s personality, insights, perceptions, and judgments, as part of the therapeutic process.

(v) Education and training of individuals, including family members, caregivers, and others.

(vi) Care coordination, case management, and transition services.

(vii) Consultative services to groups, programs, organizations, or communities.

(viii) Modification of environments (home, work, school, or community) and adaptation of processes, including the application of ergonomic principles.

(ix) Assessment, design, fabrication, application, fitting, and training in assistive technology, adaptive devices, orthotic devices, and prosthetic devices.

(x) Assessment, recommendation, and training in techniques to enhance functional mobility, including wheelchair management.

(xi) Driver rehabilitation and community mobility.

(xii) Management of feeding, eating, and swallowing to enable eating and feeding performance.

(xiii) Application of superficial, thermal and mechanical physical agent modalities, and use of a range of specific therapeutic procedures (such as basic wound management; techniques to enhance sensory, perceptual, and cognitive processing; therapeutic exercise techniques to facilitate participation in occupations) to enhance performance skills.

(xiv) Use of specialized knowledge and skills as attained through continuing education and experience for the application of deep thermal and electrotherapeutic modalities, therapeutic procedures specific to occupational therapy and wound care management for treatment to enhance participation in occupations as defined by rules adopted by the board.

(d) Engaging in administration, consultation, testing, education and research as related to paragraphs (a), (b) and (c) of this subsection and further established in rule.

Illinois Statute: Illinois Compiled Statutes 225 ILCS 75/2

(6) "Occupational therapy" means the therapeutic use of purposeful and meaningful occupations or goal-directed activities to evaluate and provide interventions for individuals, groups, and populations who have a disease or disorder, an impairment, an activity limitation, or a participation restriction that interferes with their ability to function independently in their daily life roles, including activities of daily living (ADLs) and instrumental activities of daily living (IADLs). Occupational therapy services are provided for the purpose of habilitation, rehabilitation, and to promote health and wellness. Occupational therapy may be provided via technology or telecommunication methods, also known as telehealth, however the standard of care shall be the same whether a patient is seen in person, through telehealth, or other method of electronically enabled health care. Occupational therapy practice may include any of the following:

(a) remediation or restoration of performance abilities that are limited due to impairment in biological, physiological, psychological, or
neurological processes;  
(b) modification or adaptation of task, process, or the environment or the teaching of compensatory techniques in order to enhance performance;  
(c) disability prevention methods and techniques that facilitate the development or safe application of performance skills; and  
(d) health and wellness promotion strategies, including self-management strategies, and practices that enhance performance abilities.

The licensed occupational therapist or licensed occupational therapy assistant may assume a variety of roles in his or her career including, but not limited to, practitioner, supervisor of professional students and volunteers, researcher, scholar, consultant, administrator, faculty, clinical instructor, fieldwork educator, and educator of consumers, peers, and family.

(7) "Occupational therapy services" means services that may be provided to individuals, groups, and populations, when provided to treat an occupational therapy need, including the following:  
(a) evaluating, developing, improving, sustaining, or restoring skills in activities of daily living, work, or productive activities, including instrumental activities of daily living and play and leisure activities;  
(b) evaluating, developing, remediating, or restoring sensorimotor, cognitive, or psychosocial components of performance with considerations for cultural context and activity demands that affect performance;  
(c) designing, fabricating, applying, or training in the use of assistive technology, adaptive devices, seating and positioning, or temporary, orthoses and training in the use of orthoses and prostheses;  
(d) adapting environments and processes, including the application of ergonomic principles, to enhance performance and safety in daily life roles;  
(e) for the occupational therapist or occupational therapy assistant possessing advanced training, skill, and competency as demonstrated through criteria that shall be determined by the Department, applying physical agent modalities as an adjunct to or in preparation for engagement in occupations;  
(f) evaluating and providing intervention in collaboration with the client, family, caregiver, or others;  
(g) educating the client, family, caregiver, or others in carrying out appropriate nonskilled interventions;  
(h) consulting with groups, programs, organizations, or communities to provide population-based services;  
(i) assessing, recommending, and training in techniques to enhance functional mobility, including wheelchair management;  
(j) driver rehabilitation and community mobility;  
(k) management of feeding, eating, and swallowing to enable or enhance performance of these tasks;  
(l) low vision rehabilitation;  
(m) lymphedema and wound care management;  
(n) pain management; and  
(o) care coordination, case management, and transition services.

Indiana Statute: Indiana Code §25-23.5-1-5 and 25-23.5-1-6.5

§25-23.5-1-5  
Sec. 5. “Practice of occupational therapy” means the therapeutic use of everyday life occupations and occupational therapy services to:  
(1) aid individuals or groups to participate in meaningful roles and situations in the home, school, the workplace, the community, or other settings;  
(2) promote health and wellness through research and practice; and  
(3) serve individuals or groups who are well but have been or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation, or participation restriction.

The practice of occupational therapy addresses the physical, cognitive, psychosocial, sensory, and other aspects of performance in a variety of
Occupational Therapy Profession - Scope of Practice

contexts to support engagement in everyday life activities that affect a person's health, well-being, and quality of life throughout the person's life span.

§25-23.5-1-6.5
Sec. 6.5. "Occupational therapy services" means services that are provided to promote health and wellness, prevent disability, preserve functional capabilities, prevent barriers for occupational performance from occurring, and enable or improve performance in everyday activities, including services that do the following:

1. Establish, remediate, or restore a skill or ability that is impaired or not yet developed. Occupational therapy services include identifying speech, language, and hearing that are impaired or not yet developed, but does not include the remediation of speech, language, and hearing skills and abilities.

2. Modify or adapt a person or an activity or environment of a person or compensate for a loss of a person’s functions.

3. Evaluate factors that affect daily living activities, instrumental activities of daily living, and other activities relating to work, play, leisure, education, and social participation. These factors may include body functions, body structure, habits, routines, role performance, behavior patterns, sensory motor skills, cognitive skills, communication and interaction skills, and cultural, physical, psychosocial, spiritual, developmental, environmental, and socioeconomic contexts and activities that affect performance.

4. Perform interventions and procedures relating to the factors described in subdivision (3), including the following:
   (A) Task analysis and therapeutic use of occupations, exercises, and activities.
   (B) Education and training in self-care, self-management, home management, and community or work reintegration.
   (C) Care coordination, case management, transition, and consultative services.
   (D) Modification of environments and adaptation processes, including the application of ergonomic and safety principles.
   (E) Assessment, design, fabrication, application, fitting, and training in assistive technology, adaptive devices, and orthotic devices, and training in the use of prosthetic devices. However, this does not include the following:
      (i) Gait training.
      (ii) Training in the use of hearing aids, tracheoesophageal valves, speaking valves, or electrolarynx devices related to the oral production of language.
      (iii) Remediation of speech, language, and hearing disorders.
      (iv) Fabrication of shoe inserts.
   (F) Assessment, recommendation, and training in techniques to enhance safety, functional mobility, and community mobility, including wheelchair management and mobility. However, this does not include gait training.
   (G) Management of feeding, eating, and swallowing to enable eating and feeding performance.
   (H) Application of physical agent modalities and use of a range of specific therapeutic procedures used in preparation for or concurrently with purposeful and occupation based activities, including techniques to enhance sensory-motor, perceptual, and cognitive processing, manual therapy techniques, and adjunctive and preparatory activities for occupational performance. However, manual therapy does not include spinal manipulation, spinal adjustment, or grade 5 mobilization.

Iowa Statute: Iowa Code §148b.2

3. "Occupational therapy" means the therapeutic use of occupations, including everyday life activities with individuals, groups, populations, or organizations to support participation, performance, and function in roles and situations in home, school, workplace, community, and other settings. Occupational therapy services are provided for habilitation, rehabilitation, and the promotion of health and wellness to those who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation, or participation restriction. Occupational therapy addresses the physical, cognitive, psychosocial, sensory-perceptual, and other aspects of performance in a variety of contexts and environments to support engagement in occupations that affect physical and mental health, well-being, and quality of life.

### Occupational Therapy Profession - Scope of Practice

- Psychosocial aspects;
- Designing, fabricating, applying, and training in the use of assistive technology or orthotic devices and training in the use of prosthetic devices for functional mobility and activities of daily living;
- Adapting environments and processes, including the application of ergonomic principles, to enhance performance and safety in daily life roles;
- Applying superficial physical agent modalities as an adjunct to or in preparation for engagement in occupations;
- Applying deep physical agent modalities as an adjunct to or in preparation for engagement in occupations, in accordance with KRS 319A.080;
- Evaluating and providing intervention in collaboration with the client, family, caregiver, or others;
- Educating the client, family, caregiver, or others in carrying out appropriate nonskilled interventions; and
- Consulting with groups, programs, organizations, or communities to provide population based services;

(8) "Deep physical agent modalities" means any device that uses sound waves or agents which supply or induce an electric current through the body, which make the body a part of the circuit, including iontophoresis units with a physician's prescription, ultrasound, transcutaneous electrical nerve stimulation units and functional electrical stimulation, or microcurrent devices; and

(9) "Superficial physical agent modalities" means hot packs, cold packs, ice, fluidotherapy, paraffin, water, and other commercially available superficial heating and cooling devices.

### Regulation: Kentucky Administrative Regulations, 201 KAR 28:10

**Section 1. Definitions.**

(5) "Basic activities of daily living" means tasks or activities that are oriented toward taking care of one's own body; those tasks that are performed daily by an individual that pertain to and support one's self-care, mobility, and communication; and includes the following activities:

- Bathing and showering;
- Bowel and bladder management;
- Dressing;
- Swallowing, eating, and feeding;
- Functional mobility;
- Personal device care;
- Personal hygiene and grooming;
- Sexual activity;
- Sleep and rest; and
- Toileting and toilet hygiene

(7) "Components of performance" means activity and occupational demands, client factors, performance skills, context, and environment.

(10) "Functional mobility" means moving from one position or place to another including in-bed mobility, wheelchair mobility, transportation of objects through space, and functional ambulating transfers, driving, and community mobility.

(12) "Instrumental activities of daily living" means complex tasks or activities that are oriented toward interacting with the environment and are essential to self-maintenance matters which extend beyond personal care, including:
Occupational Therapy Profession - Scope of Practice

(a) Care of others;
(b) Care of pets;
(c) Child rearing;
(d) Communication management;
(e) Financial management;
(f) Health management and maintenance;
(g) Home establishment, management, and maintenance;
(h) Meal preparation and cleanup;
(i) Safety and emergency maintenance;
(j) Shopping;
(k) Spiritual activities; and
(l) Selection and supervision of caregivers.

(14) "Occupations" means activities, tasks or roles that individuals engage in which provide intrinsic value and meaning for the individual, society, and culture.

(20) "Performance abilities" means the utilization of performance skills in the participation of active daily life.

(21) "Performance skills" means the observable actions of a person that have implicit functional purposes, including motor skills, processing skills, interaction skills, and communication skills.

(22) "Restoration" means to restore a performance skill or ability that has been impaired.

Regulation: Kentucky Administrative Regulations, 201 KAR 28: 190

Section 1. Definitions.
(3) "Low-vision services" means occupational therapy services designed for the purpose of maximizing the use of residual vision in order to maintain or restore function in daily life roles and activities. Low-vision services include:
   (a) Occupational profiling, analysis of occupational performance, and intervention planning that focuses on adapting or altering environments and processes and the implementation of the intervention plan; and
   (b) Training in the use of assistive technology for the purpose of improving performance skills and performance abilities in basic and instrumental activities of daily living, work or productive activities, play, and leisure.

(5) "Visual-therapy services" means occupational therapy services designed for the purpose of maximizing visual perceptual components of performance in order to restore or maintain daily life roles and activities.

(6) "Visually related rehabilitative treatment plan" means a comprehensive vision plan of care for the rehabilitation and treatment of the visually-impaired or legally-blind individual which is developed by the optometrist, ophthalmologist, or physician after the evaluation and diagnosis of the individual client and which includes a general description of the low-vision services and the visual therapy services that are to be provided by the OT/L. A visually-related rehabilitative treatment plan is periodically reviewed by the optometrist, ophthalmologist, or physician.
### Occupational Therapy Profession- Scope of Practice

### Louisiana Statute: Louisiana Revised Statutes §37:3003

(3)(a) "Occupational therapy" means the application of any activity in which one engages for the purposes of evaluation, interpretation, treatment planning, and treatment of problems interfering with functional performance in persons impaired by physical illness or injury, emotional disorders, congenital or developmental disabilities, or the aging process, in order to achieve optimum functioning and prevention and health maintenance. The occupational therapist may enter a case for the purposes of providing consultation and indirect services and evaluating an individual for the need of services. Prevention, wellness, and education related services shall not require a referral; however, in workers' compensation injuries preauthorization shall be required by the employer or workers' compensation insurer or provider. Implementation of direct occupational therapy to individuals for their specific medical condition or conditions shall be based on a referral or order from a physician, advanced practice registered nurse, dentist, podiatrist, or optometrist licensed to practice. Practice shall be in accordance with published standards of practice established by the American Occupational Therapy Association, Inc., and the essentials of accreditation established by the agencies recognized to accredit specific facilities and programs.

(b) Specific occupational therapy services include, but are not limited to activities of daily living (ADL); the design, fabrication, and application of prescribed temporary splints; sensorimotor activities; the use of specifically designed crafts; guidance in the selection and use of adaptive equipment; therapeutic activities to enhance functional performance; prevocational evaluation and training and consultation concerning the adaptation of physical environments for persons with disabilities. These services are provided to individuals or groups through medical, health, educational, and social systems.

### Maine Statute: Maine Revised Statutes, Title 32, Chapter 32, § 2272

12. **Occupational therapy.** "Occupational therapy" means the assessment, planning and implementation of a program of purposeful activities to develop or maintain adaptive skills necessary to achieve the maximal physical and mental functioning of the individual in the individual's daily pursuits. The practice of "occupational therapy" includes, but is not limited to, assessment and treatment of individuals whose abilities to cope with the tasks of living are threatened or impaired by developmental deficits, the aging process, learning disabilities, poverty and cultural differences, physical injury or disease, psychological and social disabilities or anticipated dysfunction, using:

A. Treatment techniques such as task-oriented activities to prevent or correct physical or emotional deficits or to minimize the disabling effect of these deficits in the life of the individual;

B. Assessment techniques such as assessment of cognitive and sensory motor abilities, assessment of the development of self-care activities and capacity for independence, assessment of the physical capacity for prevocational and work tasks, assessment of play and leisure performance and appraisal of living areas for the disabled; and

C. Specific occupational therapy techniques such as daily living skill activities, the fabrication and application of splinting devices, sensory motor activities, the use of specifically designed manual and creative activities, guidance in the selection and use of adaptive equipment, specific exercises to enhance functional performance and treatment techniques for physical capabilities for work activities. The
### Maryland

**Statute:** Annotated Code of Maryland, Health Occupations Article § 10-101

1. “Occupational therapy” means the therapeutic use of purposeful and meaningful goal-directed activities to evaluate, consult, and treat individuals who:
   - Have a disease or disorder, impairment, activity limitation, or participation restriction that interferes with their ability to function independently in daily life roles; or
   - Benefit from the prevention of impairments and activity limitations.

2. Occupational therapy practice; limited occupational therapy practice. -- "Occupational therapy practice” or "limited occupational therapy practice” means to carry out a treatment program that applies the principles and procedures of occupational therapy.

3. Occupational therapy principles. -- "Occupational therapy principles” include:
   - The use of therapeutic activities that promote independence in daily life roles;
   - Remediation or restoration of performance abilities that are limited due to impairment in biological, physiological, psychological, or neurological processes;
   - In order to enhance performance, the adaption of task, process, or the environment, or the teaching of compensatory techniques;
   - Methods and techniques for preventing disability that facilitate the development or safe application of performance skills;
   - Health promotion strategies and practices that enhance performance abilities; and
   - Education, instruction, and research in the practice of occupational therapy.

4. Occupational therapy procedures” include:
   - Developing, improving, sustaining, or restoring skills in activities of daily living, work, or productive activities, including:
     1. Instrumental activities of daily activity; and
     2. Play and leisure activities;
   - Developing, remediating, or restoring sensorimotor, perceptual, cognitive, or psychological components of performance;
   - Designing, fabricating, applying, or training in the use of assistive technology, splinting, or orthotic devices, including training in the use of prosthetic devices;
   - Adapting environments and processes, including the application of ergonomic principles to enhance performance and safety in daily life roles;
   - Applying physical agent modalities as adjuncts to or in preparation for purposeful activity with appropriate training, as specified by the Board in regulations;
   - Promoting safe, functional mobility in daily life tasks;
   - Providing intervention in collaboration with the client, the client’s family, the client's caregiver, or others;
   - Educating the client, the client’s family, the client's caregiver, or others in carrying out appropriate nonskilled interventions; and
   - Consulting with groups, programs, organizations, and communities to provide population-based services.

   2. “Occupational therapy procedures” do not include the adjustment or manipulation of any of the osseous structures of the body or spine.

### Massachusetts

**Statute:** Massachusetts General Laws ch 112 §23a

"Occupational therapy", the application of principles, methods and procedures of evaluation, problem identification, treatment, education, and
Consultation which utilizes purposeful activity in order to maximize independence, prevent or correct disability, and maintain health. These services are used with individuals, throughout the life span, whose abilities to interact with their environment are limited by physical injury or illness, disabilities, poverty and cultural differences or the aging process. Occupational therapy includes but is not limited to:

1. Administering and interpreting tests necessary for effective treatment planning;
2. Developing daily living skills, perceptual motor skills, sensory integrative functioning, play skills and prevocational and vocational work capacities;
3. Designing, fabricating or applying selected orthotic and prosthetic devices or selected adaptive equipment;
4. Utilizing designated modalities, superficial heat and cold, and neuromuscular facilitation techniques to improve or enhance joint motion muscle function;
5. Designing and applying specific therapeutic activities and exercises to enhance or monitor functional or motor performance and to reduce stress; and
6. Adapting environments for the handicapped. These services are provided to individuals or groups through medical, health, educational, industrial or social systems. Occupational therapy shall also include delegating of selective forms of treatment to occupational therapy assistants and occupational therapy aides; provided, however, that the occupational therapist so delegating shall assume the responsibility for the care of the patient and the supervision of the occupational therapy assistant or the occupational therapy aide.

**Regulation: Code of Massachusetts Regulations 259 CMR 3.01**

Treatment. A treatment program shall be consistent with the statutory scope of practice and shall:

(a) Include the therapeutic use of goal-directed activities, exercises and techniques and the use of group process to enhance occupational performance. Treatment also includes the use of therapeutic agents or techniques in preparation for, or as an adjunct to, purposeful activity to enhance occupational performance. Treatment is directed toward maximizing functional skill and task-related performance for the development of a client's vocational, avocational, daily living or related capacities.

(b) Relate to physical, perceptual, sensory neuromuscular, sensory-integrative, cognitive or psychosocial skills.

(c) Include, where appropriate for such purposes, and under appropriate conditions, therapeutic agents and techniques based on approaches taught in an occupational therapy curriculum, included in a program of professional education in occupational therapy, specific certification programs, continuing education or in-service education. Such continuing education or in-service education must include documented educational goals and objective testing (written examination, practical examination, and/or written simulation or case study) to ascertain a level of competence. Therapeutic procedures provided must be consistent with the individual's level of competence.

(d) Require that appropriate supervision take place when a occupational therapist delegates treatment, including the employment of therapeutic agents and techniques to occupational therapy assistants, students, temporary license holders or occupational therapy aides, rehabilitation aides or persons known by other similar titles. (e) Require that the occupational therapist, occupational therapy assistant, occupational therapist student, and occupational therapy assistant student shall:

1. Comply with federal and state laws and Board regulations;
2. Comply with the AOTA Standards of Practice and Code of Ethics; and
3. Provide only those services that are in the best interest of the client.

{(c) "Occupational therapy services" means those services provided to promote health and wellness, prevent disability, preserve functional capabilities, prevent barriers, and enable or improve performance in everyday activities, including, but not limited to, the following:

(i) Establishment, remediation, or restoration of a skill or ability that is impaired or not yet developed.
Occupational Therapy Profession- Scope of Practice

(ii) Compensation, modification, or adaptation of a person, activity, or environment.

(iii) Evaluation of factors that affect activities of daily living, instrumental activities of daily living, and other activities relating to education, work, play, leisure, and social participation. Those factors include, but are not limited to, body functions, body structure, habits, routines, role performance, behavior patterns, sensory motor skills, cognitive skills, communication and interaction skills, and cultural, physical, psychosocial, spiritual, developmental, environmental, and socioeconomic contexts and activities that affect performance.

(iv) Interventions and procedures, including, but not limited to, any of the following:

(A) Task analysis and therapeutic use of occupations, exercises, and activities.
(B) Training in self-care, self-management, home management, and community or work reintegration.
(C) Development remediation, or compensation of client factors such as body functions and body structure.
(D) Education and training.
(E) Care coordination, case management, transition, and consultative services.
(F) Modification of environments and adaptation processes such as the application of ergonomic and safety principles.
(G) Assessment, design, fabrication, application, fitting, and training in rehabilitative and assistive technology, adaptive devices, and low temperature orthotic devices, and training in the use of prosthetic devices. For the purposes of this sub-subparagraph, the design and fabrication of low temperature orthotic devices does not include permanent orthotics.
(H) Assessment, recommendation, and training in techniques to enhance safety, functional mobility, and community mobility such as wheelchair management and mobility.
(I) Management of feeding, eating, and swallowing.
(J) Application of physical agent modalities and use of a range of specific therapeutic procedures, including, but not limited to, techniques to enhance sensory-motor, perceptual, and cognitive processing, manual therapy techniques, and adjunctive and preparatory activities.
(K) Providing vision therapy services or low vision rehabilitation services, if those services are provided pursuant to a referral or prescription from, or under the supervision or comanagement of, a physician licensed under part 170 or 175 or an optometrist licensed under part 174.

(e) "Practice of occupational therapy" means the therapeutic use of everyday life occupations and occupational therapy services to aid individuals or groups to participate in meaningful roles and situations in the home, school, workplace, community, and other settings, to promote health and wellness through research and practice, and to serve those individuals or groups who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation, or participation restriction. The practice of occupational therapy addresses the physical, cognitive, psychosocial, sensory, and other aspects of performance in a variety of contexts to support engagement in everyday life activities that affect a person's health, well-being, and quality of life throughout his or her life span. The practice of occupational therapy does not include any of the following:

(i) The practice of medicine or osteopathic medicine and surgery or medical diagnosis or treatment.
(ii) The practice of physical therapy.
(iii) The practice of optometry.

Minnesota Statute: Minnesota Statutes §148.6402 and §148.6404

148.6402 DEFINITIONS
Subd. 15. Occupational therapy.
"Occupational therapy" means the use of purposeful activity to maximize the independence and the maintenance of health of an individual who is limited by a physical injury or illness, a cognitive impairment, a psychosocial dysfunction, a mental illness, a developmental or learning disability, or an adverse environmental condition. The practice encompasses evaluation, assessment, treatment, and consultation. Occupational therapy
Occupational Therapy Profession- Scope of Practice

services may be provided individually, in groups, or through social systems. Occupational therapy includes those services described in section 148.6404.

148.6404 SCOPE OF PRACTICE.
The practice of occupational therapy by an occupational therapist or occupational therapy assistant includes, but is not limited to, intervention directed toward:

1. assessment and evaluation, including the use of skilled observation or the administration and interpretation of standardized or nonstandardized tests and measurements, to identify areas for occupational therapy services;
2. providing for the development of sensory integrative, neuromuscular, or motor components of performance;
3. providing for the development of emotional, motivational, cognitive, or psychosocial components of performance;
4. developing daily living skills;
5. developing feeding and swallowing skills;
6. developing play skills and leisure capacities;
7. enhancing educational performance skills;
8. enhancing functional performance and work readiness through exercise, range of motion, and use of ergonomic principles;
9. designing, fabricating, or applying rehabilitative technology, such as selected orthotic and prosthetic devices, and providing training in the functional use of these devices;
10. designing, fabricating, or adapting assistive technology and providing training in the functional use of assistive devices;
11. adapting environments using assistive technology such as environmental controls, wheelchair modifications, and positioning;
12. employing physical agent modalities, in preparation for or as an adjunct to purposeful activity, within the same treatment session or to meet established functional occupational therapy goals; and
13. Promoting health and wellness.

Mississippi Statute: Mississippi Code §73-24-13

7. Occupational therapy means the therapeutic use of purposeful and meaningful (goal-directed) activities and/or exercises to evaluate and treat an individual who has, or is at risk for, a disease or disorder, impairment, activity limitation or participation restriction which interferes with his ability to function independently in daily life roles and to promote health and wellness across his lifespan.

8. Occupational therapy intervention includes:
   a. remediation or restoration of performance abilities that are limited due to impairment in biological, physiological, psychological or neurological processes;
   b. adaptation of task, process or the environment, or the teaching of compensatory techniques in order to enhance functional performance;
   c. disability prevention methods and techniques which facilitate the development or safe application of functional performance skills; or
   d. health promotion strategies and practices which enhance functional performance abilities.

9. Occupational therapy service includes, but is not limited to:
   a. evaluating, developing, improving, sustaining or restoring skill in activities of daily living (ADLS), work or productive activities, including instrumental activities of daily living (IADLS), play and leisure activities;
   b. evaluating, developing, remediating or restoring physical, sensorimotor, cognitive or psycho social components of performance;
   c. designing, fabricating, applying or training in the use of assistive technology or orthotic devices, and training in the use of prosthetic devices;
## Occupational Therapy Profession- Scope of Practice

- d. adaptation of environments and processes, including the application of ergonomic principles, to enhance functional performance and safety in daily life roles;
- e. application of physical agent modalities as an adjunct to or in preparation for engagement in an occupation or functional activity;
- f. evaluating and providing intervention in collaboration with the client, family, caregiver or other person responsible for the client;
- g. educating the client, family, caregiver or others in carrying out appropriate nonskilled interventions;
- h. consulting with groups, programs, organizations or communities to provide population-based services; or
- i. participation in administration, education, and research, including both clinical and academic environments.

### Missouri

**Statute: Missouri Revised Statutes §324.050**

(6) "Occupational therapy", the use of purposeful activity or interventions designed to achieve functional outcomes which promote health, prevent injury or disability and which develop, improve, sustain or restore the highest possible level of independence of any individual who has an injury, illness, cognitive impairment, psychosocial dysfunction, mental illness, developmental or learning disability, physical disability or other disorder or condition. It shall include assessment by means of skill observation or evaluation through the administration and interpretation of standardized or nonstandardized tests and measurements. Occupational therapy services include, but are not limited to:

- (a) The assessment and provision of treatment in consultation with the individual, family or other appropriate persons;
- (b) Interventions directed toward developing, improving, sustaining or restoring daily living skills, including self-care skills and activities that involve interactions with others and the environment, work readiness or work performance, play skills or leisure capacities or enhancing educational performances skills;
- (c) Developing, improving, sustaining or restoring sensorimotor, oral-motor, perceptual or neuromuscular functioning; or emotional, motivational, cognitive or psychosocial components of performance; and
- (d) Education of the individual, family or other appropriate persons in carrying out appropriate interventions.

Such services may encompass assessment of need and the design, development, adaptation, application or training in the use of assistive technology devices; the design, fabrication or application of rehabilitative technology such as selected orthotic devices, training in the use of orthotic or prosthetic devices; the application of ergonomic principles; the adaptation of environments and processes to enhance functional performance; or the promotion of health and wellness.

### Montana

**Statute: Montana Code §37-24-103**

(5) "Occupational therapy" means the therapeutic use of purposeful goal-directed activities and interventions to achieve functional outcomes to maximize the independence and the maintenance of health of an individual who is limited by disease or disorders, impairments, activity limitations, or participation restrictions that interfere with the individual's ability to function independently in daily life roles. The practice encompasses evaluation, assessment, treatment, consultation, remediation, and restoration of performance abilities that are limited due to impairment in biological, physiological, psychological, or neurological processes. Occupational therapy services may be provided individually, in groups, or through social systems. Occupational therapy interventions include but are not limited to:

- (a) evaluating, developing, improving, sustaining, or restoring skills in activities of daily living, work or productive activities, including instrumental activities of daily living, and play and leisure activities;
- (b) developing perceptual-motor skills and sensory integrative functioning;
- (c) developing play skills and leisure capacities and enhancing educational performance skills;
- (d) designing, fabricating, or applying orthotic or prosthetic devices, applying and training in the use of assistive technology, and training in the use of orthotic and prosthetic devices;
- (e) providing for the development of emotional, motivational, cognitive, psychosocial, or physical components of performance;
- (f) providing assessment and evaluation, including the use of skilled observation or the administration and interpretation of standardized or nonstandardized tests and measurements to identify areas for occupational therapy services;
Occupational Therapy Profession- Scope of Practice

(g) adaptation of task, process, or the environment, as well as teaching of compensatory techniques, in order to enhance performance;
(h) developing feeding and swallowing skills;
(i) enhancing and assessing work performance and work readiness through occupational therapy intervention, including education and instruction, activities to increase and improve general work behavior and skill, job site evaluation, on-the-job training and evaluation, development of work-related activities, and supported employment placement;
(j) providing neuromuscular facilitation and inhibition, including the activation, facilitation, and inhibition of muscle action, both voluntary and involuntary, through the use of appropriate sensory stimulation, including vibration or brushing, to evoke a desired muscular response;
(k) application of physical agent modalities, as defined in this section, as an adjunct to or in preparation for engagement in purposeful goal-directed activity;
(l) promoting health and wellness;
(m) evaluating and providing intervention in collaboration with the client, family, caregiver, or others;
(n) educating the client, family, caregiver, or others in carrying out appropriate nonskilled interventions;
(o) consulting with groups, programs, organizations, or communities to provide population-based services; and
(p) use of prescribed topical medications.

(8) "Physical agent modalities" means those modalities that produce a response in soft tissue through the use of light, water, temperature, sound, or electricity. Physical agent modalities are characterized as adjunctive methods used in conjunction with or in immediate preparation for patient involvement in purposeful activity. Superficial physical agent modalities include hot packs, cold packs, ice, fluidotherapy, paraffin, water, and other commercially available superficial heating and cooling devices. Use of superficial physical agent modalities is limited to the shoulder, arm, elbow, forearm, wrist, and hand and is subject to the provisions of 37-24-105. Use of sound and electrical physical agent modality devices is limited to the shoulder, arm, elbow, forearm, wrist, and hand and is subject to the provisions of 37-24-106.

Nebraska Statute: Nebraska Code §38-2510 & §38-2526

38-2510. Occupational therapy, defined.
(1) Occupational therapy means the use of purposeful activity with individuals who are limited by physical injury or illness, psychosocial dysfunction, developmental or learning disabilities, or the aging process in order to maximize independent function, prevent further disability, and achieve and maintain health and productivity.
(2) Occupational therapy encompasses evaluation, treatment, and consultation and may include (a) remediation or restoration of performance abilities that are limited due to impairment in biological, physiological, psychological, or neurological processes, (b) adaptation of task, process, or the environment, or the teaching of compensatory techniques, in order to enhance performance, (c) disability prevention methods and techniques which facilitate the development or safe application of performance skills, and (d) health promotion strategies and practices which enhance performance abilities.

38-2526. Occupational therapist; services authorized.
Occupational therapy services mean an occupational therapist may perform the following services:
1. Evaluate, develop, improve, sustain, or restore skills in activities of daily living, work activities, or productive activities, including instrumental activities of daily living, and play and leisure activities;
2. Evaluate, develop, remediate, or restore sensorimotor, cognitive, or psychosocial components of performance;
3. Design, fabricate, apply, or train in the use of assistive technology or orthotic devices and train in the use of prosthetic devices;
4. Adapt environments and processes, including the application of ergonomic principles, to enhance performance and safety in daily life roles;
Occupational Therapy Profession- Scope of Practice

5. If certified pursuant to section 38-2530, apply physical agent modalities as an adjunct to or in preparation for engagement in occupations when applied by a practitioner who has documented evidence of possessing the theoretical background and technical skills for safe and competent use;
6. Evaluate and provide intervention in collaboration with the client, family, caregiver, or others;
7. Educate the client, family, caregiver, or others in carrying out appropriate nonskilled interventions; and
8. Consult with groups, programs, organizations, or communities to provide population-based services.

Nevada Statute: Nevada Revised Statutes §640a.050

“Occupational therapy” defined.
“Occupational therapy” means the use of evaluations, teachings and interventions to facilitate the activities of daily living of a client in groups or on an individual basis to enable the client to participate in and perform activities of daily living in various settings, including, without limitation, at home, at school, in the workplace and in the community. The term includes:
1. Providing services for habilitation, rehabilitation and the promotion of health and wellness to a client;
2. Assisting a client in achieving the highest practicable physical, cognitive and psychosocial well-being to improve the physical and mental health of the client and the quality of life of the client;
3. Teaching a client skills for daily living;
4. Assisting a client in the development of cognitive and perceptual motor skills, and in the integration of sensory functions;
5. Assisting a client in learning to play and to use his or her leisure time constructively;
6. Assisting a client in developing functional skills necessary to be considered for employment;
7. Assessing the need for, designing, constructing and training a client in the use and application of selected orthotic devices and adaptive equipment;
8. Assessing the need for prosthetic devices for the upper body and training a client in the functional use of prosthetic devices;
9. Teaching a client crafts and exercises designed to enhance his or her ability to function normally;
10. Administering to a client manual tests of his or her muscles and range of motion, and interpreting the results of those tests;
11. Incorporating into the treatment of a client the safe and appropriate use of physical agent modalities and techniques which have been acquired through an appropriate program of education approved by the Board pursuant to subsection 2 of NRS 640A.120, or through a program of continuing education or higher education; and
12. Adapting the environment of a client to reduce the effects of handicaps.

New Hampshire Statute: New Hampshire Revised Statutes Title 30 §326-C:1

III. "Occupational therapy" means the therapeutic use of purposeful and meaningful occupations or goal-directed activities to evaluate and treat individuals who have a disease or disorder, impairment, activity limitation, or participation restriction which interferes with their ability to function independently in daily life roles, and to promote health and wellness.
(a) Occupational therapy intervention may include:
   (1) Remediation or restoration of performance abilities that are limited due to impairment in biological, physiological, psychological, or neurological processes.
   (2) Adaptation of task, process, or the environment, or the teaching of compensatory techniques, in order to enhance performance.
   (3) Disability prevention methods and techniques which facilitate the development or safe application of performance skills.
   (4) Health promotion strategies and practices which enhance performance abilities.
(b) Occupational therapy services include, but are not limited to:
   (1) Evaluating, developing, improving, sustaining or restoring skills in activities of daily living, work or productive
Occupational Therapy Profession - Scope of Practice

activities, including instrumental activities of daily living, and play and leisure activities.
(2) Evaluating, developing, remediating, or restoring sensorimotor, cognitive, or psychosocial components of performance.
(3) Designing, fabricating, applying, or training in the use of assistive technology or orthotic devices, and training in the use of prosthetic devices.
(4) Adaptation of environments and processes, including the application of ergonomic principles, to enhance performance and safety in daily life roles.
(5) Application of physical agent modalities as an adjunct to, or in preparation for, engagement in purposeful activities and occupations.
(6) Evaluating and providing intervention in collaboration with the client, family, caregiver, or others.
(7) Educating the client, family, caregiver, or others in carrying out appropriate non-skilled interventions.
(8) Consulting with groups, programs, organizations, or communities to provide population-based services.

New Jersey Statute: New Jersey Revised Statutes § 45:9-37.53

"Occupational therapy" means the evaluation, planning, and implementation of a program of purposeful activities to develop or maintain functional skills necessary to achieve the maximal physical or mental functioning, or both, of the individual in the person’s daily occupational performance. The tasks of daily living may be threatened or impaired by physical injury or illness, developmental disability, sensorimotor disability, psychological and social disability, the aging process, poverty, or cultural deprivation. Occupational therapy utilizes task oriented activities adapted to prevent or correct physical or emotional disabilities as well as to minimize the disabling effects of those disabilities on the life of the individual. Occupational therapy services include the use of specific techniques which enhance functional performance and include, but are not limited to, the evaluation and assessment of an individual’s self-care, lifestyle performance patterns, work skills, performance related cognitive, sensory, motor, perceptual, affective, interpersonal and social functioning, vocational, and prevocational capacities, the design, fabrication, and application of adaptive equipment or prosthetic or orthotic devices, excluding dental devices, the administration of standardized and nonstandardized assessments, and consultation concerning the adaptation of physical environments for persons with disabilities. These services are provided to individuals or groups through medical, health, educational and social systems.

"Purposeful activities" means acts and occupations of craftsmanship and workmanship, as well as creative, educational, or other activities, which in whole or in part are used to correct, compensate for or prevent dysfunction in the tasks and activities of everyday living, and which simultaneously incorporate personally and culturally relevant biological, psychological and social elements that produce positive adaptation and motivational behavior.

Regulations: New Jersey Administrative Code Title 13, Chapter 44K

13:44K-1.2 DEFINITIONS

"Occupational therapy services" means the use of specific techniques which enhance the functional performance of a client, including the evaluation and assessment of a client’s self-care, lifestyle performance patterns, work skills, performance related cognitive, sensory, motor, perceptual, affective, interpersonal and social functioning, vocational and prevocational capacities. Occupational therapy services also includes the design, fabrication and application of adaptive equipment or prosthetic or orthotic devices, excluding dental devices, the utilization of physical agent modalities, the administration of standardized and non-standardized assessments and consultation, including recommendations for the adaptation of physical environments.

13:44K-5.1 SCOPE OF PRACTICE OF A LICENSED OCCUPATIONAL THERAPIST

a) The scope of practice of a licensed occupational therapist shall include:
### Occupational Therapy Profession - Scope of Practice

1. The provision of direct, indirect and/or consultative services to a client affected by physical, psycho-social, cognitive, congenital and/or developmental disorders or the aging process, to improve and/or prevent loss of physical or mental functioning and to promote wellness;
2. The administration of standardized and/or non-standardized assessments and/or the observation of a client and the environment to identify areas of functional abilities or deficits. Areas, which may be assessed shall include the performance of activities of daily living, including recreation, leisure or work related skills, which are affected by sensory, motor, developmental, perceptual, cognitive and/or psycho-social abilities;
3. The interpretation of the results of the assessment process described in (a) 2 above, to determine the need for an intervention plan for the client. Such a plan shall be developed and administered by the occupational therapist in collaboration with the client, the client's family and related medical, health, educational or social agencies or professionals;
4. The development and utilization of, and education and training in, purposeful, task oriented activities for the client to improve, restore and/or maintain optimal performance of life skills, roles and functions including work, recreation, leisure skills and activities of daily living;
5. The design, fabrication, application and/or selection of adaptive equipment, prosthetics and/or orthotic devices, except dental devices;
6. Consultation concerning the adaptation of physical environments; and
7. The utilization of physical agent modalities, consistent with N.J.A.C. 13:44K-5.4, as an adjunct to, or in preparation for, purposeful activities to enhance occupational performance with which the licensee is familiar as a result of training and experience.

**13:44K-5.2 SCOPE OF PRACTICE OF A LICENSED OCCUPATIONAL THERAPY ASSISTANT**

a) The scope of practice of a licensed occupational therapy assistant, working under the supervision of a licensed occupational therapist as provided in N.J.A.C. 13:44K-6.1, shall include:

1. The provision of direct, indirect and/or consultative services to a client affected by physical, psycho-social, cognitive, congenital and/or developmental disorders or the aging process, to improve and/or prevent loss of physical or mental functioning and to promote wellness;
2. The administration of standardized and/or non-standardized assessments and/or the observation of a client and the environment to assist in the identification of functional abilities or deficits. Areas, which may be assessed shall include the performance of activities of daily living, including recreation, leisure or work related skills which are affected by sensory, motor, developmental, perceptual, cognitive and/or psycho-social abilities;
3. Assisting in the development and implementation of an intervention plan for the client;
4. The development and utilization of, and education and training in, purposeful, task oriented activities for the client to improve, restore and/or maintain optimal performance of life skills, roles and functions including work, recreation, leisure skills and the activities of daily living;
5. The design, fabrication, application and/or selection of adaptive equipment, prosthetics and/or orthotic devices, except dental devices;
6. Consultation concerning the adaptation of physical environments; and
7. The utilization of physical agent modalities, consistent with N.J.A.C. 13:44K-5.4, as an adjunct to, or in preparation for, purposeful activity to enhance occupational performance with which the licensee is familiar as a result of training and experience.

### New Mexico

**Statute: New Mexico Revised Statutes §61-12A-3 & §61-12A-4**

**61-12A-3. Definitions.**

F. "occupational therapy" means the therapeutic use of occupations, including everyday life activities with persons across the life span, including groups, populations or organizations, to enhance or enable participation, performance or function in roles, habits and routines in home, school, workplace, community and other settings. Occupational therapy services are provided for habilitation, rehabilitation and the promotion of health and wellness to those clients who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation or participation restriction.

"Occupational therapy" includes addressing the physical, cognitive, psychosocial, sensory-perceptual and other aspects of performance in a
variety of contexts and environments to support engagement in occupations that affect physical and mental health, well-being and quality of life. Occupational therapy uses everyday life activities to promote mental health and support functioning in people with or at risk of experiencing a range of mental health disorders, including psychiatric, behavioral, emotional and substance abuse disorders;

61-12A-4. Occupational therapy services.
The practice of occupational therapy includes the following processes and services:

A. evaluation of factors affecting all areas of occupation, including activities of daily living, instrumental activities of daily living, rest and sleep, education, work, productivity, play, leisure and social participation; including:
   (1) client factors, including neuromuscular, sensory, visual, mental, cognitive and pain factors and body structures, including cardiovascular, digestive, integumentary and genitourinary systems and structures related to movement;
   (2) habits, routines, roles and behavior patterns;
   (3) cultural, physical, environmental, social and spiritual contexts and activity demands that affect performance; and
   (4) performance skills, including motor process and communication and interaction skills;

B. activity analysis to determine activity demands of occupations performed;

C. design, implementation and modification of therapeutic interventions, including the following activities related to selection of intervention strategies to direct the process of interventions:
   (1) establishment, remediation or restoration of a skill or ability that has not yet developed, is impaired or is in decline;
   (2) compensation, modification or adaptation of activity or environment to enhance performance or to prevent injuries, disorders or other conditions;
   (3) retention, maintenance and enhancement of skills and capabilities without which performance in everyday life activities would decline;
   (4) promotion of health and wellness, including the use of self-management strategies to enable or enhance performance in everyday life activities;
   (5) prevention of barriers to performance, including injury and disability prevention; and
   (6) interventions and procedures to promote or enhance safety and performance in areas of occupation, including:
      (a) therapeutic use of occupations, exercises and activities;
      (b) training in self-care, self-management, health management and maintenance, home management, community-work reintegration, school activities and work performance;
      (c) development, remediation or compensation of neuromusculoskeletal, sensory-perceptual, sensory-integrative and modulation, visual, mental and cognitive functions, pain tolerance and management, developmental skills and behavioral skills;
      (d) therapeutic use of self, including one's personality, insights, perceptions and judgments, as part of the therapeutic process;
      (e) education and training of persons, including family members, caregivers, groups, populations and others;
      (f) care coordination, case management and transition services;
      (g) consultative services to groups, programs, organizations or communities;
      (h) modification of home, work, school and community environments and adaptation of processes, including the application of ergonomic principles;
      (i) assessment, design, fabrication, application, fitting and training in seating and positioning, assistive technology, adaptive devices and orthotic devices and training in the use of prosthetic devices;
      (j) assessment, recommendation and training in techniques to enhance functional mobility, including management of wheelchairs and other mobility devices;

<tr>
<td><strong>Definition.</strong></td>
<td>The practice of the profession of occupational therapy is defined as the functional evaluation of the client, the planning and utilization of a program of purposeful activities, the development and utilization of a treatment program, and/or consultation with the client, family, caregiver or organization in order to restore, develop or maintain adaptive skills, and/or performance abilities designed to achieve maximal physical, cognitive and mental functioning of the client associated with his or her activities of daily living and daily life tasks. A treatment program designed to restore function, shall be rendered on the prescription or referral of a physician, nurse practitioner or other health care provider acting within his or her scope of practice pursuant to this title. However, nothing contained in this article shall be construed to permit any licensee hereunder to practice medicine or psychology, including psychotherapy or to otherwise expand such licensee's scope of practice beyond what is authorized by this chapter.</td>

Occupational Therapy Profession- Scope of Practice

2. Relate to physical, perceptual, sensory, neuromuscular, sensory-integrative, cognitive or psychosocial skills.
3. Include, where appropriate for such purposes, and under appropriate conditions, modalities and techniques based on approaches taught in an occupational therapy curriculum and included in a program of professional education in occupational therapy registered by the department, and consistent with areas of individual competence. These approaches are based on:
   i. The neurological and physiological sciences as taught in a registered occupational therapy professional education program. Modalities and techniques may be based on, but not limited to, any one or more of the following:
      a. sensory integrative approaches;
      b. developmental approaches;
      c. sensorimotor approaches;
      d. neurophysiological treatment approaches;
      e. muscle reeducation;
      f. superficial heat and cold; or
      g. cognitive and perceptual remediation.
   ii. The behavioral and social sciences as taught in a registered occupational therapy professional education program. Modalities and techniques may be based on, but not limited to, any one or more of the following:
      a. behavioral principles;
      b. work-related programs and simulation;
      c. group dynamics and process; or
      d. leisure/avocational activities.
   iii. The biomechanical sciences as taught in a registered occupational therapy professional education program. Modalities and techniques may be based on, but not limited to, any one or more of the following:
      a. passive, active assistive, and active range of motion;
      b. muscle strengthening and conditioning;
      c. positioning;
      d. participation in design, fabrication, and/or application, and patient education related to orthotics and adaptive equipment;
      e. evaluation of appropriateness, participation in design concept, application and patient education related to prosthetics;
      f. daily life tasks;
      g. adapting the client's environment; or
      h. work-related programs.

d. Any treatment program described in this regulation shall be rendered on the prescription or referral of a physician. In accordance with section 7901 and articles 131 and 153 of the Education Law, nothing contained in this regulation shall be construed to permit any licensee hereunder to engage in the practice of medicine or psychology, including psychotherapy.

§76.6 Definition of occupational therapy assistant practice and the use of the title occupational therapy assistant.

a. An occupational therapy assistant shall mean a person licensed or otherwise authorized in accordance with this Part who provides occupational therapy services under the direction and supervision of an occupational therapist or licensed physician and performs client related activities assigned by the supervising occupational therapist or licensed physician. Only a person licensed or otherwise authorized under this Part shall participate in the practice of occupational therapy as an occupational therapy assistant, and only a person licensed or otherwise authorized under this Part shall use the title occupational therapy assistant.

b. As used in this section, client related activities shall mean:
   1. contributing to the evaluation of a client by gathering data, reporting observations and implementing assessments delegated by the
### Occupational Therapy Profession - Scope of Practice

1. Supervising occupational therapist or licensed physician;
2. Consulting with the supervising occupational therapist or licensed physician in order to assist him or her in making determinations related to the treatment plan, modification of client programs or termination of a client's treatment;
3. The utilization of a program of purposeful activities, a treatment program, and/or consultation with the client, family, caregiver, or other health care or education providers, in keeping with the treatment plan and under the direction of the supervising occupational therapist or licensed physician;
4. The use of treatment modalities and techniques that are based on approaches taught in an occupational therapy assistant educational program registered by the department or accredited by a national accreditation agency which is satisfactory to the department, and that the occupational therapy assistant has demonstrated to the occupational therapist or licensed physician that he or she is competent to use; or
5. The immediate suspension of any treatment intervention that appears harmful to the client and immediate notification of the occupational therapist or licensed physician.

### North Carolina

**Statute: North Carolina General Statutes §90-270.67**

4. "Occupational therapy" means a health care profession providing evaluation, treatment and consultation to help individuals achieve a maximum level of independence by developing skills and abilities interfered with by disease, emotional disorder, physical injury, the aging process, or impaired development. Occupational therapists use purposeful activities and specially designed orthotic and prosthetic devices to reduce specific impairments and to help individuals achieve independence at home and in the work place.

**Regulation: 21 NCAC §38.0103**

(12) "Occupational Therapy", as defined in G.S. 90-270.67(4), may include evaluation of activities of daily living (ADL), instrumental activities of daily living (IADL), education, work, play, leisure, and social participation.

(13) "Occupational Therapy evaluation, treatment, and consultation" include the following:
    (a) remediation or restitution of performance abilities that are limited due to impairment in biological, physiological, psychosocial, and developmental process;
    (b) adaptation of skills, process or environment, or the teachings of compensatory techniques in order to enhance performance;
    (c) disability prevention methods and techniques that facilitate the development or safe application of performance skills;
    (d) promotion of health and wellness to those who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation, or participation restriction; and
    (e) interpretation of the physical, cognitive, psychosocial, sensory, and other aspects of performance in a variety of contexts to support engagement in everyday life activities that affect health, well-being, and quality of life.

(15) "Occupational therapy services" include the following:
    (a) Methods or strategies selected to direct the process of interventions such as:
        (i) Establishment, remediation, or restoration of a skill or ability that has not yet developed or is impaired;
        (ii) Compensation, modification, or adaptation of activity or environment to enhance performance;
        (iii) Maintenance and enhancement of capabilities without which performance in everyday life activities would decline;
        (iv) Health promotion and wellness to enable or enhance performance in everyday life activities; and
        (v) Prevention of barriers to performance, including disability prevention.
    (b) Evaluation of factors affecting activities of daily living (ADL), instrumental activities of daily living (IADL), education, work, play, leisure,

(c) Interventions and procedures to promote or enhance safety and performance in activities of daily living (ADL), instrumental activities of daily living (IADL), education, work, play, leisure and social participation, including:

(i) Therapeutic use of occupations, exercises, and activities;
(ii) Training in self-care, self-management, home management, and community or work reintegration;
(iii) Development, remediation, or compensation of physical, cognitive, neuromuscular, sensory functions and behavioral skills;
(iv) Therapeutic use of self, including one’s personality, insights, perceptions, and judgments, as part of the therapeutic process;
(v) Education and training of individuals, including family members, caregivers, and others;
(vi) Care coordination, case management, and transition services;
(vii) Consultative services to groups, programs, organizations, or communities;
(viii) Modification of home, work, school, or community environments and adaptation of processes, including the application of ergonomic principles;
(ix) Assessment, design, fabrication, application, fitting, and training in assistive technology, adaptive devices, and orthotic devices, and training in the use of prosthetic devices;
(x) Assessment, recommendation, and training in techniques to enhance functional mobility, including wheelchair management;
(xi) Driver rehabilitation and community mobility;
(xii) Management of feeding, eating, and swallowing to enable eating and feeding performance; and
(xiii) Application of physical agent modalities and use of a range of specific therapeutic procedures to enhance performance skills.

**North Dakota Statute: North Dakota Century Code §43-40**

5. "Occupational therapy practice" means the use of occupation and purposeful activity or intervention designed to achieve functional outcomes that promote health, prevent injury or disability, and which develop, improve, sustain, or restore the highest possible level of independence of any individual who has an injury, illness, cognitive impairment, psychosocial dysfunction, mental illness, developmental or learning disability, physical disability or other disorder or condition, and occupational therapy education. Occupational therapy encompasses evaluation, treatment, consultation, research, and education. Occupational therapy practice includes evaluation by skilled observation, administration, and interpretation of standardized and nonstandardized tests and measurements. The occupational therapy practitioner designs and implements interventions directed toward developing, improving, sustaining, and restoring sensorimotor, neuromuscular, emotional, cognitive, or psychosocial performance components. Interventions include activities that contribute to optimal occupational performance including self-care; daily living skills; skills essential for productivity, functional communication and mobility; positioning; social integration; cognitive mechanisms; enhancing play and leisure skills; and the design, provision, and training in the use of assistive technology, devices, orthotics, or prosthetics or environmental adaptations to accommodate for loss of occupational performance. Therapy may be provided individually or in groups to prevent secondary conditions, promote community integration, and support the individual's health and well-being within the social and cultural contexts of the individual's natural environment.
Regulation: North Dakota Administrative Code §55.5-03-01-03; 55.5-03-01-04 and 55.5-03-01-05

55.5-03-01-03. Specific occupational therapy services.
The practice of occupational therapy means the therapeutic use of occupations, including everyday life activities with individuals, groups, populations, or organizations to support participation, performance, and function in roles and situations in home, school, workplace, community, and other settings. Occupational therapy services are provided for habilitation, rehabilitation, and the promotion of health and wellness, including methods delivered via telerehabilitation to those who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation, or participation restriction. Occupational therapy addresses the physical, cognitive, psychosocial, sensory-perceptual, and other aspects of performance in a variety of contexts and environments to support engagement in occupations that affect physical and mental health, well-being, and quality of life.

55.5-03-01-04. Occupational therapy evaluation.
Evaluation of factors affecting activities of daily living (ADL), instrumental activities of daily living (IADL), rest and sleep, education, work, play, leisure, and social participation, includes:
1. Client factors, including body functions (such as neuromusculoskeletal, sensory-perceptual, visual, mental, cognitive, and plain factors) and body structures (such as cardiovascular, digestive, nervous, integumentary, genitourinary systems, and structures related to movement), values, beliefs, and spirituality.
2. Habits, routines, roles, rituals, and behavior patterns.
3. Physical and social environments, cultural, personal, temporal, and virtual contexts and activity demands that affect performance. Performance skills, including motor and praxis, sensory-perceptual, emotional regulation, cognitive, communication and social skills.

55.5-03-01-05. Occupational therapy intervention.
1. Methods or approaches selected to direct the process of interventions include:
a. Establishment, remediation, or restoration of a skill or ability that has not yet developed, is impaired, or in decline.
b. Compensation, modification, or adaptation of activity or environment to enhance performance or to prevent injuries, disorders, or other conditions.
c. Retention and enhancement of skills or abilities without which performance in everyday life activities would decline.
d. Promotion of health and wellness, including the use of self-management strategies, to enable or enhance performance in everyday life activities.
e. Prevention of barriers to performance and participation, including injury and disability prevention.
2. Interventions and procedures to promote or enhance safety and performance in activities of daily living (ADL), instrumental activities of daily living (IADL), rest and sleep, education, work, play, leisure, and social participation, including:
a. Therapeutic use of occupations, exercises, and activities.
b. Training in self-care, self-management, health management and maintenance, home management, community or work reintegration, and school activities and work performance.
c. Development, remediation, or compensation of neuromusculoskeletal, sensory-perceptual, visual, mental, and cognitive functions, pain tolerance and management, and behavioral skills.
d. Therapeutic use of self, including one's personality, insights, perceptions, and judgements, as part of the therapeutic process.
e. Education and training of individuals, including family members, caregivers, groups, populations, and others.
f. Care coordination, case management, and transition services.
g. Consultative services to groups, programs, organizations, or communities. h. Modification of home, work, school, or community environments and adaptation of processes, including the application of ergonomic principles.
Occupational Therapy Profession - Scope of Practice

h. Modification of home, work, school, or community environments and adaptation of processes, including the application of ergonomic principles.
i. Assessment, design, fabrication, application, fitting, and training in seating and positioning, assistive technology, adaptive devices, and orthotic devices, and training in the use of prosthetic devices.
j. Assessment, recommendations, and training in techniques to enhance functional mobility, including management of wheelchairs and other mobility devices.
k. Low vision rehabilitation.
l. Driver rehabilitation and community mobility.
m. Management of feeding, eating, and swallowing to enable eating and feeding performance.
n. Application of physical agent modalities, and use of a range of specific therapeutic procedures (such as wound care management, interventions to enhance sensory-perceptual and cognitive processing, and manual therapy) to enhance performance skills. An occupational therapist may purchase, store, and administer topical medications, including aerosol medications, as part of the practice of occupational therapy, but shall not dispense or sell any of the medications to patients. An occupational therapist shall comply with any protocols of the United States Pharmacopoeia for storage of medications. A valid order or prescription for medication classified as a legend drug is needed before administration to a patient. Occupational therapy facilities must work with a pharmacist to assist with proper protocols for storage of medications. A record of dosage, for, quantity, and strength of medication administered to each patient is required in the medical record.
o. Facilitating the occupational performance of groups, populations, or organizations through the modification of environments and the adaptation of processes.

Ohio

Statute: Ohio Revised Code §4755.04

(A) “Occupational therapy” means the therapeutic use of everyday life activities or occupations with individuals or groups for the purpose of participation in roles and situations in the home, school, workplace, community, and other settings. The practice of occupational therapy includes all of the following:

(1) Methods or strategies selected to direct the process of interventions, including, but not limited to, establishment, remediation, or restoration of a skill or ability that has not yet developed or is impaired and compensation, modification, or adaptation of activity or environment to enhance performance;
(2) Evaluation of factors affecting activities of daily living, instrumental activities of daily living, education, work, play, leisure, and social participation, including, but not limited to, sensory motor abilities, vision, perception, cognition, psychosocial, and communication and interaction skills;
(3) Interventions and procedures to promote or enhance safety and performance in activities of daily living, education, work, play, leisure, and social participation, including, but not limited to, application of physical agent modalities, use of a range of specific therapeutic procedures to enhance performance skills, rehabilitation of driving skills to facilitate community mobility, and management of feeding, eating, and swallowing to enable eating and feeding performance;
(4) Consultative services, case management, and education of patients, clients, or other individuals to promote self-management, home management, and community and work reintegration;
(5) Designing, fabricating, applying, recommending, and instructing in the use of selected orthotic or prosthetic devices and other equipment which assists the individual to adapt to the individual’s potential or actual impairment;
(6) Administration of topical drugs that have been prescribed by a licensed health professional authorized to prescribe drugs, as defined in section 4729.01 of the Revised Code.

Regulation: Oregon Administrative Rule §339-01-0005

(6) “Occupational Therapy” further defines scope of practice as meaning the therapeutic use of everyday life activities (occupations) with individuals or groups for the purpose of participation in roles and situations in home, school, workplace, community, and other settings. Occupational therapy services are provided for the purpose of promoting health and wellness and to those who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation, or participation restriction. Occupational therapy addresses the physical, cognitive, psychosocial, sensory, and other aspects of performance in a variety of contexts to support engagement in everyday life activities that affect health, well-being, and quality of life:

(a) Occupational Therapists use selected methods or strategies to direct the process of interventions such as:
   (A) Establish, remediate or restore skill or ability that has not yet developed or is impaired;
   (B) Compensate, modify, or adapt activity or environment to enhance performance;
   (C) Maintain and enhance capabilities without which performance in everyday life activities would decline;
   (D) Promote health and wellness to enable or enhance performance in everyday life activities;
   (E) Prevent barriers to performance, including disability prevention.

(b) Occupational Therapists evaluate factors affecting activities of daily living (ADL), instrumental activities of daily living (IADL), education, work, play, leisure, and social participation, including:
   (A) Client factors, including body functions (such as neuromuscular, sensory, visual, perceptual, cognitive) and body structures (such as cardiovascular, digestive, integumentary, genitourinary systems);
   (B) Habits, routines, roles and behavior patterns;
Occupational Therapy Profession- Scope of Practice

(C) Cultural, physical, environmental, social, and spiritual contexts and activity demands that affect performance;
(D) Performance skills, including motor, process, and [communication/] interaction skills.

c) Occupational Therapists use the following interventions and procedures to promote or enhance safety and performance in activities of daily living (ADL), instrumental activities of daily living (IADL), education, work, play, leisure, and social participation, including:
   (A) Therapeutic use of occupations, exercise, and activities;
   (B) Training in self-care, self-management, home management and community/work reintegration;
   (C) Development, remediation, or compensation of physical, cognitive, neuromuscular, sensory functions and behavior skills;
   (D) Therapeutic use of self, including one's personality, insights, perceptions, and judgments, as part of the therapeutic process;
   (E) Education and training of individuals, including family members, caregivers, and others;
   (F) Care coordination, case management, and transition services;
   (G) Consultative services to groups, programs, organizations, or communications;
   (H) Modification of environments (home, work, school, or community) and adaptation of processes, including the application of ergonomic principles;
   (I) Assessment, design, fabrication, application, fitting, and training in assistive technology, adaptive devise, and orthotic devices, and training in the use of prosthetic devices;
   (J) Assessment, recommendation, and training in techniques to enhance functional mobility, including wheelchair management;
   (K) Driver rehabilitation and community mobility;
   (L) Management of feeding and eating to enable swallowing performance;

Pennsylvania Statute: 63 P.L. 502, No. 140 Cl. 63

"Occupational therapy." The evaluation of learning and performance skills and the analysis, selection and adaptation of activities for an individual whose abilities to cope with the activities of daily living, to perform tasks normally performed at a given stage of development and to perform essential vocational tasks which are threatened or impaired by that person's developmental deficiencies, aging process, environmental deprivation or physical, psychological, injury or illness, through specific techniques which include:
   (1) Planning and implementing activity programs to improve sensory and motor functioning at the level of performance normal for the individual's stage of development.
   (2) Teaching skills, behaviors and attitudes crucial to the individual's independent, productive and satisfying social functioning.
   (3) The design, fabrication and application of splints, not to include prosthetic or orthotic devices, and the adaptation of equipment necessary to assist patients in adjusting to a potential or actual impairment and instructing in the use of such devices and equipment.
   (4) Analyzing, selecting and adapting activities to maintain the individual's optimal performance of tasks to prevent disability.

Puerto Rico Statute: 20 L.P.R.A. § 1047

d) Occupational therapy. — Means the science that studies occupation by means of the therapeutic use of activities of daily living (occupations) with individuals or groups of individuals so that they may participate in their roles and situations at home, in school, at work, in the community and in other scenarios. Occupational therapy services are provided with the purpose of promoting health and well-being for those who have developed or are at risk of developing illnesses, injuries, disorders, conditions, disabilities, deficiencies, limitations in activities or social participation restrictions. Occupational therapy addresses physical, cognitive, and sensory aspects, as well as other aspects of performance in a variety of contexts to support participation in daily living activities that affect health, well-being and quality of life.

| Rhode Island | **Rhode Island General Laws §5-40.1-3**      | (f)(1) “Occupational therapy” (OT) is the use of purposeful activity or interventions designed to achieve functional outcomes which promote health, prevent injury or disability, and develop, improve, sustain, or restore the highest possible level of independence of any individual who has an injury, illness, cognitive impairment, sensory impairment, psychosocial dysfunction, mental illness, developmental or learning disability, physical disability, or other disorder or condition.  
(2) Occupational therapy includes evaluation by means of skilled observation of functional performance and/or assessment through the administration and interpretation of standardized or non-standardized tests and measurements.  
(g) "Occupational therapy services" includes, but is not limited to:  
(i) Evaluating and providing treatment in consultation with the individual, family, or other appropriate persons;  
(ii) Interventions directed toward developing, improving, sustaining, or restoring daily living skills, including self-care skills and activities that involve interactions with others and the environment, work readiness or work performance, play skills or leisure capacities or educational performance skills;  
(iii) Developing, improving, sustaining, or restoring sensory-motor, oral-motor, perceptual, or neuromuscular functioning; or emotional, motivational, cognitive, or psychosocial components of performance; and  
(iv) Educating the individual, family, or other appropriate persons in carrying out appropriate interventions.  
(2) These services may encompass evaluating need; and designing, developing, adapting, applying, or training in the use of assistive technology devices; designing, fabricating or applying rehabilitative technology, such as selected orthotic devices; training in the functional use of orthotic or prosthetic devices; applying therapeutic activities, modalities, or exercise as an adjunct to or in preparation for functional performance; applying ergonomic principles; adapting environments and processes to enhance daily living skills; or promoting health and wellness. |
| South Carolina | **South Carolina Code of Laws §40-36-20**  | (7) "Occupational therapy" means the functional evaluation and treatment of individuals whose ability to cope with the tasks of living are threatened or impaired by developmental deficits, the aging process, poverty and cultural differences, physical injury or illness, or psychological or social disability. The treatment utilizes occupational, namely goal-oriented activities, to prevent or correct physical or emotional deficits or to minimize the disabling effect of these deficits in the life of the individual. Specific occupational therapy techniques include, but are not limited to, activities of daily living (ADL), the fabrication and application of splints, sensory-motor activities, the use of specifically designed crafts, guidance in the selection and use of adaptive equipment, exercises to enhance functional performance, prevocational evaluation and treatment and consultation concerning adaption of physical environments for the handicapped. These techniques are applied in the treatment of individual patients or clients, in groups, or through social systems. |
| South Dakota | **South Dakota Codified Laws §36-31-1**        | (4) "Occupational therapy," the evaluation, planning and implementation of a program of purposeful activities to develop or maintain adaptive skills necessary to achieve the maximal physical and mental functioning of the individual in his or her daily pursuits. The practice of occupational therapy includes consultation, evaluation, and treatment of individuals whose abilities to cope with the tasks of living are threatened or impaired by developmental deficits, the aging process, learning disabilities, poverty and cultural differences, physical injury or disease, psychological and social disabilities, or anticipated dysfunction. Occupational therapy services include such treatment techniques as task-oriented activities to prevent or correct physical or emotional deficits or to minimize the disabling effect of these deficits in the life of the individual; such evaluation techniques as assessment of sensory integration and motor abilities, assessment of development of self-care and feeding, activities and capacity for independence, assessment of the physical capacity for prevocational and work tasks, assessment of play and leisure performance, and |

## Occupational Therapy Profession- Scope of Practice

### Tennessee Statute: Tennessee Code § 1150-02-.02

(3) “Occupational therapy practice” means the therapeutic use of everyday life activities (occupations) for the purpose of enabling individuals or groups to participate in roles and situations in home, school, workplace, community and other settings. Occupational therapy addresses the physical, cognitive, psychosocial and sensory aspects of performance in a variety of contexts to support engagement in occupations that affect health, well-being and quality of life. Occupational therapy practice includes, but is not limited to:

- The screening, evaluation, assessment, planning, implementation and discharge planning of an occupational therapy program or services in consultation with the client, family members, caregivers and other appropriate persons;
- Selection and administration of standardized and non-standardized tests and measurements to evaluate factors affecting activities of daily living, instrumental activities of daily living, education, work, play, leisure and social participation, including:
  1. Body functions and body structures;
  2. Habits, routines, roles and behavior patterns;
  3. Cultural, physical, environmental, social and spiritual context and activity demands that affect performance; and
  4. Performance skills, including motor, process and communication/interaction skills;
- Methods or strategies selected to direct the process of interventions, such as:
  1. Modification or adaptation of an activity or the environment to enhance performance;
  2. Establishment, remediation or restoration of a skill or ability that has not yet developed or is impaired;
  3. Maintenance and enhancement of capabilities without which performance in occupations would decline;
  4. Health promotion and wellness to enable or enhance performance and safety of occupations; and
  5. Prevention of barriers to performance, including disability prevention;
- Interventions and procedures to promote or enhance safety and performance in activities of daily living, instrumental activities of daily living, education, work, play, leisure and social participation, including:
  1. Therapeutic use of occupations, exercises and activities;
  2. Training in self-care, self-management, home management and community/work reintegration;
  3. Development, remediation or compensation of physical, cognitive, neuromuscular and sensory functions and behavioral skills;
  4. Therapeutic use of self, including an individual’s personality, insights, perceptions and judgments as part of the therapeutic process;
  5. Education and training of individuals, family members, caregivers and others;
  6. Care coordination, case management, discharge planning and transition services;
  7. Consulting services to groups, programs, organizations or communities;
  8. Assessment, recommendations and training in techniques and equipment to enhance functional mobility, including wheelchair management;
  9. Driver rehabilitation and community mobility; and
  10. Management of feeding and eating skills to enable feeding and eating performance;
- Management of occupational therapy services, including the planning, organizing, staffing, coordinating, directing or controlling of individuals and organizations;
- Providing instruction in occupational therapy to students in an accredited occupational therapy or occupational therapy assistant program.

Appraisal of living areas for the handicapped; physical agent modalities limited to the upper extremities to enhance physical functional performance, if certified in accordance with § 36-31-6; and specific occupational therapy techniques such as activities of daily living skills, designing, fabricating, or applying selected orthotic devices or selecting adaptive equipment, sensory integration and motor activities, the use of specifically designed manual and creative activities, specific exercises to enhance functional performance, and treatment techniques for physical capabilities for work activities. Such techniques are applied in the treatment of individual patients or clients, in groups, or through social systems.
### Occupational Therapy Profession - Scope of Practice

- Educational program by persons who are trained as occupational therapists or occupational therapy assistants; and
- Administration, interpretation and application of research to occupational therapy services.

(4) Occupational therapy services are provided for the purpose of promoting health and wellness to those clients who have, or are at risk of developing, illness, injury, disease, disorder, impairment, disability, activity limitation or participation restriction and may include:

   (a) Training in the use of prosthetic devices;
   (b) Assessment, design, development, fabrication, adaptation, application, fitting and training in the use of assistive technology and adaptive and selective orthotic devices;
   (c) Application of physical agent modalities with proper training and certification;
   (d) Assessment and application of ergonomic principles;
   (e) Adaptation or modification of environments (home, work, school or community) and use of a range of therapeutic procedures (such as wound care management, techniques to enhance sensory, perceptual and cognitive processing, and manual therapy techniques) to enhance performance skills, occupational performance or the promotion of health and wellness.

(5) Occupational therapy practice may occur in a variety of settings, including, but not limited to:

   (a) Institutional inpatient settings, such as acute rehabilitation facilities, psychiatric hospitals, community and specialty hospitals, nursing facilities and prisons;
   (b) Outpatient settings, such as clinics, medical offices and therapist offices;
   (c) Home and community settings, such as homes, group homes, assisted living facilities, schools, early intervention centers, daycare centers, industrial and business facilities, hospices, sheltered workshops, wellness and fitness centers and community mental health facilities;
   (d) Research facilities; and
   (e) Educational institutions.

(6) Occupational therapy practice includes specialized services provided by occupational therapists or occupational therapy assistants who are certified or trained in areas of specialization, which include, but are not limited to, hand therapy, neurodevelopmental treatment, sensory integration, pediatrics, geriatrics and neurorehabilitation, through programs approved by AOTA or other nationally recognized organizations.

### Texas

**Statute: Texas Health and Safety Code § 454.006**

**PRACTICE OF OCCUPATIONAL THERAPY.**

(a) In this section, "diagnosis" means the identification of a disease from its symptoms.

(b) A person practices occupational therapy if the person:

   (1) evaluates or treats a person whose ability to perform the tasks of living is threatened or impaired by developmental deficits, the aging process, environmental deprivation, sensory impairment, physical injury or illness, or psychological or social dysfunction;
   (2) uses therapeutic goal-directed activities to:
      (A) evaluate, prevent, or correct physical or emotional dysfunction; or
      (B) maximize function in a person's life; or
   (3) applies therapeutic goal-directed activities in treating patients on an individual basis, in groups, or through social systems, by means of direct or monitored treatment or consultation.

(c) The practice of occupational therapy does not include diagnosis or psychological services of the type typically performed by a licensed psychologist.
Occupational Therapy Profession- Scope of Practice

Regulation: Texas Administrative Code, Title 40, Part 12, § 362.1

(32) Occupational Therapy Practice--Includes:
   (A) Methods or strategies selected to direct the process of interventions such as:
      (i) Establishment, remediation, or restoration of a skill or ability that has not yet developed or is impaired.
      (ii) Compensation, modification, or adaptation of activity or environment to enhance performance.
      (iii) Maintenance and enhancement of capabilities without which performance in everyday life activities would decline.
      (iv) Health promotion and wellness to enable or enhance performance in everyday life activities.
      (v) Prevention of barriers to performance, including disability prevention.
   (B) Evaluation of factors affecting activities of daily living (ADL), instrumental activities of daily living (IADL), education, work, play, leisure, and social participation, including:
      (i) Client factors, including body functions (such as neuromuscular, sensory, visual, perceptual, cognitive) and body structures (such as cardiovascular, digestive, integumentary, genitourinary systems).
      (ii) Habits, routines, roles and behavior patterns.
      (iii) Cultural, physical, environmental, social, and spiritual contexts and activity demands that affect performance.
      (iv) Performance skills, including motor, process, and communication/interaction skills.
   (C) Interventions and procedures to promote or enhance safety and performance in activities of daily living (ADL), instrumental activities of daily living (IADL), education, work, play, leisure, and social participation, including:
      (i) Therapeutic use of occupations, exercises, and activities.
      (ii) Training in self-care, self-management, home management and community/work reintegration.
      (iii) Development, remediation, or compensation of physical, cognitive, neuromuscular, sensory functions and behavioral skills.
      (iv) Therapeutic use of self, including one's personality, insights, perceptions, and judgments, as part of the therapeutic process.
      (v) Education and training of individuals, including family members, caregivers, and others.
      (vi) Care coordination, case management and transition services.
      (vii) Consultative services to groups, programs, organizations, or communities.
      (viii) Modification of environments (home, work, school, or community) and adaptation of processes, including the application of ergonomic principles.
      (ix) Assessment, design, fabrication, application, fitting and training in assistive technology, adaptive devices, and orthotic devices, and training in the use of prosthetic devices.
      (x) Assessment, recommendation, and training in techniques to enhance functional mobility including wheelchair management.
      (xi) Driver rehabilitation and community mobility.
      (xii) Management of feeding, eating, and swallowing to enable eating and feeding performance.
      (xiii) Application of physical agent modalities, and use of a range of specific therapeutic procedures (such as wound care management; techniques to enhance sensory, perceptual, and cognitive processing; manual therapy techniques) to enhance performance skills.

Utah Statute: Utah Code 58-42a-102

(6)
   (a) "Practice of occupational therapy" means the therapeutic use of everyday life activities with an individual:
      (i) that has or is at risk of developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation, or participation restriction; and
      (ii) to develop or restore the individual's ability to engage in everyday life activities by addressing physical, cognitive, psychosocial,
Occupational Therapy Profession - Scope of Practice

sensory, or other aspects of the individual's performance.

(b) "Practice of occupational therapy" includes:
   (i) establishing, remediating, or restoring an undeveloped or impaired skill or ability of an individual;
   (ii) modifying or adapting an activity or environment to enhance an individual's performance;
   (iii) maintaining and improving an individual's capabilities to avoid declining performance in everyday life activities;
   (iv) promoting health and wellness to develop or improve an individual's performance in everyday life activities;
   (v) performance-barrier prevention for an individual, including disability prevention;
   (vi) evaluating factors that affect an individual's activities of daily living in educational, work, play, leisure, and social situations, including:
      (A) body functions and structures;
      (B) habits, routines, roles, and behavioral patterns;
      (C) cultural, physical, environmental, social, virtual, and spiritual contexts and activity demands that affect performance; and
      (D) motor, process, communication, interaction, and other performance skills;
   (vii) providing interventions and procedures to promote or enhance an individual's safety and performance in activities of daily living in educational, work, and social situations, including:
      (A) the therapeutic use of occupations and exercises;
      (B) training in self-care, self-management, home-management, and community and work reintegration;
      (C) the development, remediation, or compensation of behavioral skills and physical, cognitive, neuromuscular, and sensory functions;
      (D) the education and training of an individual's family members and caregivers;
      (E) care coordination, case management, and transition services;
      (F) providing consulting services to groups, programs, organizations, or communities,
      (G) modifying the environment and adapting processes, including the application of ergonomic principles;
      (H) assessing, designing, fabricating, applying, fitting, and providing training in assistive technology, adaptive devices, orthotic devices, and prosthetic devices;
      (I) assessing, recommending, and training an individual in techniques to enhance functional mobility, including wheelchair management;
      (J) driver rehabilitation and community mobility;
      (K) enhancing eating and feeding performance; and
      (L) applying physical agent modalities, managing wound care, and using manual therapy techniques to enhance an individual's performance skills, if the occupational therapist has received the necessary training as determined by division rule in collaboration with the board.

Vermont Statute: Vermont Statutes §3351

(5) "Occupational therapy practice" means the therapeutic use of purposeful and meaningful occupations (goal-directed activities) to evaluate and treat individuals who have a disease or disorder, impairment, activity limitation, or participation restriction that interferes with their ability to function independently in daily life roles, and to promote health and wellness. Occupational therapy intervention may include:
   (A) remediation or restoration of performance abilities that are limited due to impairment in biological, physiological, psychological, or neurological processes;
   (B) adaptation of task, process, or the environment, or the teaching of compensatory techniques, in order to enhance performance;
   (C) disability prevention methods and techniques that facilitate the development of safe application of performance skills;
   (D) health promotion strategies and practices that enhance performance abilities.

(6) "Occupational therapy services" include:
### Occupational Therapy Profession - Scope of Practice

- (A) evaluating, developing, improving, sustaining, or restoring skills in activities of daily living, work, or productive activities, including instrumental activities of daily living, and play and leisure activities;
- (B) evaluating, developing, remediating, or restoring sensorimotor, cognitive, or psychosocial components of performance;
- (C) designing, fabricating, applying, or training in the use of assistive technology or orthotic devices, and training in the use of prosthetic devices;
- (D) adaptation of environments and processes, including the application of ergonomic principles, to enhance performance and safety in daily life roles;
- (E) application of physical agent modalities as an adjunct to or in preparation for engagement in occupations;
- (F) evaluating and providing intervention in collaboration with the individual receiving treatment, family, caregiver, or others;
- (G) educating the individual receiving treatment, family, caregiver, or others in carrying out appropriate nonskilled interventions; and
- (H) consulting with groups, programs, organizations, or communities to provide population-based services.

### Virginia Statute: Code of Virginia § 54.1-2900

**Definitions.**

"Practice of occupational therapy" means the therapeutic use of occupations for habilitation and rehabilitation to enhance physical health, mental health, and cognitive functioning and includes the evaluation, analysis, assessment, and delivery of education and training in basic and instrumental activities of daily living; the design, fabrication, and application of orthoses (splints); the design, selection, and use of adaptive equipment and assistive technologies; therapeutic activities to enhance functional performance; vocational evaluation and training; and consultation concerning the adaptation of physical, sensory, and social environments.

### Regulation: Virginia Administrative Code, 18 VA C85-80-90 and 18VAC85-80-100

**18 VAC 85-80-90. General responsibilities**

A. An occupational therapist renders services of assessment, program planning, and therapeutic treatment upon request for such service. The practice of occupational therapy includes therapeutic use of occupations for habilitation and rehabilitation to enhance physical health, mental health, and cognitive functioning. The practice of occupational therapy may include supervisory, administrative, educational or consultative activities or responsibilities for the delivery of such services.

B. An occupational therapy assistant renders services under the supervision of an occupational therapist that do not require the clinical decision or specific knowledge, skills and judgment of a licensed occupational therapist and do not include the discretionary aspects of the initial assessment, evaluation or development of a treatment plan for a patient.

**18VAC 85-80-100. Individual responsibilities.**

A. An occupational therapist provides assessment by determining the need for, the appropriate areas of, and the estimated extent and time of treatment. His responsibilities include an initial screening of the patient to determine need for services and the collection, evaluation and interpretation of data necessary for treatment.

B. An occupational therapist provides program planning by identifying treatment goals and the methods necessary to achieve those goals for the patient. The therapist analyzes the tasks and activities of the program, documents the progress, and coordinates the plan with other health, community or educational services, the family and the patient. The services may include but are not limited to education and training in basic and instrumental activities of daily living (ADL); the design, fabrication, and application of orthoses (splints); the design, selection, and use of adaptive equipment and assistive technologies; therapeutic activities to enhance functional performance; vocational evaluation and training; and consultation concerning the adaptation of physical, sensory, and social environments.

C. An occupational therapist provides the specific activities or therapeutic methods to improve or restore optimum functioning, to compensate for...
dysfunction, or to minimize disability of patients impaired by physical illness or injury, emotional, congenital or developmental disorders, or by the aging process.

D. An occupational therapy assistant is responsible for the safe and effective delivery of those services or tasks delegated by and under the direction of the occupational therapist. Individual responsibilities of an occupational therapy assistant may include:

1. Participation in the evaluation or assessment of a patient by gathering data, administering tests, and reporting observations and client capacities to the occupational therapist;
2. Participation in intervention planning, implementation, and review;
3. Implementation of interventions as determined and assigned by the occupational therapist;
4. Documentation of patient responses to interventions and consultation with the occupational therapist about patient functionality;
5. Assistance in the formulation of the discharge summary and follow-up plans; and
6. Implementation of outcome measurements and provision of needed patient discharge resources.

(11) "Wound care management" means a part of occupational therapy treatment that facilitates healing, prevents edema, infection, and excessive scar formation, and minimizes wound complications. Treatment may include: Assessment of wound healing status; patient education; selection and application of dressings; cleansing of the wound and surrounding areas; application of topical medications, as provided under RCW 18.59.160; use of physical agent modalities; application of pressure garments and nonweight-bearing orthotic devices, excluding high-temperature custom foot orthotics made from a mold; sharp debridement of devitalized tissue; debridement of devitalized tissue with other agents; and adapting activities of daily living to promote independence during wound healing.

(2)(a) Debridement is not an entry-level skill and requires specialized training, which must include: Indications and contraindications for the use of debridement; appropriate selection and use of clean and sterile techniques; selection of appropriate tools, such as scissors, forceps, or scalpel; identification of viable and devitalized tissues; and conditions which require referral back to the referring provider. Training must be provided through continuing education, mentoring, cotreatment, and observation. Consultation with the referring provider is required if the wound exposes anatomical structures underlying the skin, such as tendon, muscle, or bone, or if there is an obvious worsening of the condition, or signs of infection.

(b)(i) Occupational therapists may perform wound care management upon showing evidence of adequate education and training by submitting an affidavit to the board attesting to their education and training as follows:

(A) For occupational therapists performing any part of wound care management, except sharp debridement with a scalpel, a minimum of fifteen hours of mentored training in a clinical setting is required to be documented in the affidavit. Mentored training includes observation, cotreatment, and supervised treatment by a licensed occupational therapist who is authorized to perform wound care management under this section or a health care provider who is authorized to perform wound care management in his or her scope of practice. Fifteen hours mentored training in a clinical setting must include a case mix similar to the occupational therapist's expected practice;
Occupational Therapy Profession- Scope of Practice

(B) For occupational therapists performing sharp debridement with a scalpel, a minimum of two thousand hours in clinical practice and an additional minimum of fifteen hours of mentored sharp debridement training in the use of a scalpel in a clinical setting is required to be documented in the affidavit. Mentored training includes observation, cotreatment, and supervised treatment by a licensed occupational therapist who is authorized to perform sharp debridement with a scalpel under this section or a health care provider who is authorized to perform wound care management, including sharp debridement with a scalpel, in his or her scope of practice. Both the two thousand hours in clinical practice and the fifteen hours of mentored training in a clinical setting must include a case mix similar to the occupational therapist's expected practice.

(ii) Certification as a certified hand therapist by the hand therapy certification commission or as a wound care specialist by the national alliance of wound care or equivalent organization approved by the board is sufficient to meet the requirements of (b)(i) of this subsection.

(1)(a) An occupational therapist licensed under this chapter may provide wound care management only:

(i) In the course of occupational therapy treatment to return patients to functional performance in their everyday occupations under the referral and direction of a physician or other authorized health care provider listed in RCW 18.59.100 in accordance with their scope of practice. The referring provider must evaluate the patient prior to referral to an occupational therapist for wound care; and

(ii) After filing an affidavit under subsection (2)(b) of this section.

(b) An occupational therapist may not delegate wound care management, including any form of debridement.

(2)(a) Debridement is not an entry-level skill and requires specialized training, which must include: Indications and contraindications for the use of debridement; appropriate selection and use of clean and sterile techniques; selection of appropriate tools, such as scissors, forceps, or scalpel; identification of viable and devitalized tissues; and conditions which require referral back to the referring provider. Training must be provided through continuing education, mentoring, cotreatment, and observation. Consultation with the referring provider is required if the wound exposes anatomical structures underlying the skin, such as tendon, muscle, or bone, or if there is an obvious worsening of the condition, or signs of infection.

(b)(i) Occupational therapists may perform wound care management upon showing evidence of adequate education and training by submitting an affidavit to the board attesting to their education and training as follows:

(A) For occupational therapists performing any part of wound care management, except sharp debridement with a scalpel, a minimum of fifteen hours of mentored training in a clinical setting is required to be documented in the affidavit. Mentored training includes observation, cotreatment, and supervised treatment by a licensed occupational therapist who is authorized to perform wound care management under this section or a health care provider who is authorized to perform wound care management in his or her scope of practice. Fifteen hours mentored training in a clinical setting must include a case mix similar to the occupational therapist's expected practice;

(B) For occupational therapists performing sharp debridement with a scalpel, a minimum of two thousand hours in clinical practice and an additional minimum of fifteen hours of mentored sharp debridement training in the use of a scalpel in a clinical setting is required to be documented in the affidavit. Mentored training includes observation, cotreatment, and supervised treatment by a licensed occupational therapist who is authorized to perform sharp debridement with a scalpel under this section or a health care provider who is authorized to perform wound care management, including sharp debridement with a scalpel, in his or her scope of practice. Both the two thousand hours in clinical practice and the fifteen hours of mentored training in a clinical setting must include a case mix similar to the occupational therapist's expected practice.

(ii) Certification as a certified hand therapist by the hand therapy certification commission or as a wound care specialist by the national alliance of wound care or equivalent organization approved by the board is sufficient to meet the requirements of (b)(i) of this subsection.

(c) The board shall develop an affidavit form for the purposes of (b) of this subsection.
### Occupational Therapy Profession- Scope of Practice

**Regulation: Washington Administrative Code §246-847-010**

1. "Adapting environments for individuals with disabilities" includes assessing needs, identifying strategies, implementing and training in the use of strategies, and evaluating outcomes. Occupational therapy focuses on the interaction of an individual's skills and abilities, the features of the environment, and the demands and purposes of activities.

4. "Client-related tasks" are routine tasks during which an occupational therapy aide may interact with the client but does not act as a primary service provider of occupational therapy services. The following factors must be present when an occupational therapist or occupational therapy assistant delegates a selected client-related task to the aide:
   - The outcome anticipated for the delegated task is predictable;
   - The status of the client and the environment is stable and will not require that the aide make judgments, interpretations, or adaptations;
   - The client has demonstrated some previous performance ability in executing the task; and
   - The task routine and process have been clearly established.

7. "Evaluation" means the process of obtaining and interpreting data necessary for treatment which includes, but is not limited to, planning for and documenting the evaluation process and results. The evaluation data may be gathered through record review, specific observation, interview, and the administration of data collection procedures which include, but are not limited to, the use of standardized tests, performance checklists, and activities and tasks designed to evaluate specific performance abilities.

11. "Scientifically based use of purposeful activity" means the treatment of individuals using established methodology based upon the behavioral and biological sciences and includes the therapeutic use of everyday life activities (occupations) with individuals or groups for the purpose of participation in roles and situations in home, school, workplace, community, and other settings. "Occupations" are activities having unique meaning and purpose in an individual's life.

12. "Teaching daily living skills" means the instruction in daily living skills by an occupational therapist or occupational therapy assistant based upon the evaluation of all the components of the individual's disability and the adaptation or treatment based on the evaluation.

**West Virginia Statute: West Virginia Code §30-28-3; §30-28-4.**

§30-28-3. Definitions

(n) "The practice of occupational therapy" means the therapeutic use of everyday life activities or occupations to address the physical, cognitive, psychosocial, sensory, and other aspects of performance of individuals or groups of individuals, including those who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation or participation restriction, to promote health, wellness and participation in roles and situations in home, school, workplace, community and other settings.

§30-28-4. Scope of practice;

(a) The scope of practice of occupational therapy includes, but is not limited to:
   - Methods or strategies selected to direct the process of interventions such as:
     - Establishment, remediation, or restoration of a skill or ability that has not yet developed or is impaired;
     - Compensation, modification, or adaptation of activity or environment to enhance performance;
     - Maintenance and enhancement of capabilities without which performance in everyday life activities would decline;
     - Health promotion and wellness to enable or enhance performance in everyday life activities; and
Occupational Therapy Profession- Scope of Practice

(E) Prevention of barriers to performance, including disability prevention.

(2) Evaluation of factors affecting activities of daily living (ADL), instrumental activities of daily living (IADL), education, work, play, leisure and social participation, including:
   (A) Client factors, including body functions and body structures;
   (B) Habits, routines, roles and behavior patterns;
   (C) Cultural, physical, environmental, social and spiritual contexts and activity that affect performance; and
   (D) Performance skills, including motor, process and communication/interaction skills.

(3) Interventions and procedures to promote or enhance safety and performance in activities of daily living (ADL), instrumental activities of daily living (IADL), education, work, play, leisure and social participation, including:
   (A) Therapeutic use of occupations and preparatory, adjunctive and functional activities;
   (B) Training in self-care, self-management home management and community/work reintegration;
   (C) Development, remediation, or compensation of physical, cognitive, neuromuscular, sensory functions, visual, vestibular and behavioral skills;
   (D) Therapeutic use of self, including one’s personality, insights, perceptions and judgments, as part of the therapeutic process;
   (E) Education and training of individuals, including family members, care givers and others;
   (F) Care coordination, case management and transition services;
   (G) Consultative services to groups, programs, organizations or communities;
   (H) Modification of environments (home, work, school or community) and adaptation of processes, including the application of ergonomic principles;
   (I) Assessment, design, fabrication, application, fitting and training in assistive technology, adaptive devices, orthotic devices and training in the use of prosthetic devices to enhance occupational performance;
   (J) Assessment, recommendation and training in techniques to enhance functional mobility, including wheelchair management;
   (K) Community mobility and re-entry;
   (L) Management of feeding, eating and swallowing to enable eating and feeding performance; and
   (M) Application of physical agent modalities, and use of a range of specific therapeutic procedures and techniques to enhance occupational performance skills. Use of physical agent modalities by occupational therapy assistants must be consistent with their education (e.g. superficial thermal and mechanical modalities) and used under the general supervision of an occupational therapist.

   The use of deep thermal or electrical modalities may only be performed by the occupational therapy assistant under the direct supervision of an occupational therapist, until the board shall promulgate rules as well as establish competency standards for the use of the modalities.

 Wisconsin Statute: Wisconsin Statutes; Regulation and Licensing, § 448.96

(5) "Occupational therapy” means the therapeutic use of purposeful and meaningful occupations to evaluate and treat individuals of all ages who have a disease, disorder, impairment, activity limitation or participation restriction that interferes with their ability to function independently in daily life roles and environments and to promote health and wellness.

Regulation: Wisconsin Administrative Code OT 1.02 and 4.02

(2) “Assessment” is a component part of the evaluation process, and means the process of determining the need for, nature of, and estimated time of treatment at different intervals during the treatment, determining needed coordination with or referrals to other disciplines, and documenting these activities.

Wisconsin Statute: Wisconsin Statutes; Regulation and Licensing, § 448.96

(5) "Occupational therapy” means the therapeutic use of purposeful and meaningful occupations to evaluate and treat individuals of all ages who have a disease, disorder, impairment, activity limitation or participation restriction that interferes with their ability to function independently in daily life roles and environments and to promote health and wellness.

Regulation: Wisconsin Administrative Code OT 1.02 and 4.02

(2) “Assessment” is a component part of the evaluation process, and means the process of determining the need for, nature of, and estimated time of treatment at different intervals during the treatment, determining needed coordination with or referrals to other disciplines, and documenting these activities.
(7) “Consultation” means a work-centered, problem-solving helping relationship in which knowledge, experience, abilities, and skills are shared with client, family, caregivers, and other professionals, including physicians, in the process of helping to habilitate or rehabilitate through the use of occupational therapy.

(9) “Evaluation” means the process of obtaining and interpreting data necessary for understanding the individual system or situation. This includes planning for and documenting the evaluation process, results, and recommendations, including the need for intervention and potential change in the intervention plan.

(11) “Habilitation” means an occupational therapy intervention designed for the education, training or support services provided to individuals to assist them in acquiring and maintaining skills not yet gained or learned, thus enabling them to learn, practice, and refine skills needed for independent living, productive employment, activity, and community participation.

(23) “Rehabilitation” means the process of treatment and education to restore a person’s ability to live and work as independently as possible after a disabling injury or illness.

(24) “Screening” means the review of occupational performance skills in natural environments or educational, or clinical settings to determine the significance of any discrepancy between current performance and expected level of performance, which may be done in consultation with a physician.

(25) “Service competence” means the determination made by various methods that 2 people performing the same or equivalent procedures will obtain the same or equivalent results.

**OT 4.02 Scope of practice.**

(1) “Occupational therapy,” as defined at s. 448.96 (5), Stats., may include the following interventions:

(a) Remediation or restitution of performance abilities that are limited due to impairment in biological, physiological, psychological or neurological processes.

(b) Adaptation of task, process or environment, or the teaching of compensatory techniques, in order to enhance performance.

(c) Disability prevention methods and techniques which facilitate the development or safe application of performance skills.

(d) Health promotion strategies and practices which enhance performance abilities.

(2) Occupational therapy interventions include the following:

(a) Screening, evaluating, developing, improving, sustaining, or restoring skills in activities of daily living, work or productive activities, instrumental activities of daily living, play, leisure activities, rest and sleep, education and social participation.

(b) Evaluating, developing, remediating, or restoring sensorimotor, sensori-perceptual neuromusculoskeletal, emotional regulation, cognition, communication, social skills, or psychosocial components of performance.

(c) Designing, fabricating or training in the use of assistive technology, upper extremity orthotic devices and lower extremity positioning orthotic devices.

(d) Training in the use of prosthetic devices, excluding gait training.

(e) Adaptation of environments and processes, including the application of ergonomic principles, to enhance performance and safety in daily life roles.

(f) Application of physical agent modalities. Application is performed by an experienced therapist with demonstrated and documented

### Wyoming Statute: Wyoming Statutes § 33-40-102

(iii) “Occupational therapy” means:

- (J) The therapeutic use of occupations including everyday life activities with individuals, groups, populations or organizations to support participation, performance and function in roles and situations in home, school, workplace, community and other settings;
- (K) The provision of services for habilitation, rehabilitation and the promotion of health and wellness to those who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation or participation restriction;
- (M) Addressing the physical, cognitive, psychosocial, sensory-perceptual and other aspects of performance in a variety of contexts and environments to support engagement in occupations, contexts and environments that affect physical and mental health, well-being and quality of life;
- (N) Performing the tasks of occupational therapy through personal interaction or appropriate use of telecommunication services and other communication technologies;
- (O) Performing the tasks of an occupational therapist or occupational therapy assistant commensurate with his education, training and experience;
- (P) The practice of occupational therapy which includes:
  - (I) The evaluation of factors affecting activities of daily living, instrumental activities of daily living, rest and sleep, education, work, play, leisure and social participation;
  - (II) The use of methods or approaches to direct the process of interventions; and
  - (III) The use of interventions and procedures to promote or enhance safety and performance in activities of daily living, instrumental activities of daily living, rest and sleep, education, work, play, leisure and social participation.
