2020 AOTA Annual Conference & Expo
Boston, MA • March 26–29

www.aota.org/conference
Join us for the 2020 AOTA Annual Conference & Expo, the largest gathering of occupational therapy practitioners and students in the world!

Connect with your colleagues, get fresh perspectives, and deepen your understanding of the profession. With more than 2,000 educational and poster sessions, exceptional speakers, and an Expo Hall filled with the latest products and opportunities, the 2020 AOTA Annual Conference & Expo is the not-to-miss event of the year.

Earn up to 24 contact hours in one convenient location while getting the latest evidence-based research. Learn from leaders in the profession and return to your practice with new ideas to improve patient outcomes, advance your career, and be inspired. Whether you are a student, new to the profession, or an experienced occupational therapy professional, this Conference is for YOU!

**Boston Has Something for Everyone**

Boston’s arts, theater and cultural attractions, distinctive dining, world-class shopping, and championship sports teams attract millions of visitors each year. Surrounded by natural beauty, Boston’s 48 square miles are encircled by a bustling harbor, a tranquil coastline, and a strand of green parks. Take in spectacular views as you stroll the Harbor walk or relax in Boston Common, America’s oldest public park. Art, history, music, shopping, and dining—it’s all here for you. Whether it’s a cruise on Boston Harbor, a Boston Pops concert, or exploring the shops and restaurants of Faneuil Hall Marketplace, your stay in Boston will be filled with unforgettable experiences.
95% of 2019 AOTA Annual Conference & Expo attendees would recommend this event to a colleague.

“Quality presentations and presenters! Enjoyed all the sessions that I went to.”

“Classes and scientific research panels were excellent.”

“Loved the people, networking, and available sessions.”

“Amazing exhibitors and presentations throughout.”

Register by March 4 to SAVE!
General Sessions & Events

**International Breakfast (CE)**

“I know I need you, but I don’t know what you do”: Occupational Identity and Opportunity for OT in the Next Century

Skye Barbic, PhD, MSc, BScOT, Reg. OT(BC)

For the last century, occupational identity has been conceptualized as a targeted outcome of care. Yet, reflecting on our own occupational identity is essential to ensuring the evolution and sustainability of the profession in the future. This talk outlines a professional identity campaign that will allow occupational therapy to maximize health, well-being, and quality of life for all people, populations, and communities while sustaining its founding principles and values within a global context.

$40 per person. Includes breakfast.

**AOTF Breakfast with a Scholar (CE)**

What Really Matters at End of Life

Dr. BJ Miller, Preeminent speaker on palliative and end-of-life care

Dr. BJ Miller draws on his expertise as a physician, former Executive Director of Zen Hospice Project, and a patient. He is an advocate for a healthcare system that maximizes quality of life and that minimizes unnecessary suffering. Dr. Miller will discuss the importance of keeping the patient at the center of care and encouraging empathic end-of-life care.

$65 per person. Includes breakfast.

**Keynote Address (CE)**

Ali Stroker was a groundbreaking performer when she became the first actress in a wheelchair to appear on a Broadway stage, as Anna in the 2015 revival of Spring Awakening. Then in 2019 she became the first actress in a wheelchair to win a Tony award, for her role as Ado Annie in Oklahoma. As a humanitarian and advocate she is a co-chair of Women Who Care, which supports United Cerebral Palsy of New York City. She’s also a founding member of the anti-bullying campaign “Be More Heroic.” Ali’s inspiring work is reflected in her motto, “Making Your Limitations Your Opportunities.” Ali will be available for a meet and greet after the Keynote Address.

**President Address (CE)**

It’s Not Personal: It’s Change!

Wendy Hildenbrand, PhD, MPH, OTR/L, FAOTA

Occupational therapy is at a crossroads—again?! Yes, we are! Pivotal events create uncertainty that requires us to change, which can be unsettling and emotional. Yet, change is not new—or personal. Transformation takes root in environments that embrace change and adapt to the realities; not in spaces that are limited by fear or resistant to change. Join AOTA President Wendy Hildenbrand as we grapple with change as the “only thing constant” in the complex 21st century world.

**2020 Charity Selected by the Local Conference Committee**

Founded by Kip Tiernan in 1974, Rosie's Place was the first emergency shelter for women in the United States. The mission is to provide a safe and secure environment for poor and homeless women to maintain their dignity, seek opportunity, and find security in their lives. Visit Rosie's Place at booth #345 in the Expo Hall.
Using Measurement to Highlight OT’s Distinct Value

Craig A. Velozo, PhD, OTR/L, FAOTA

Traditional measurement approaches in health care focus on group data, virtually ignoring the individual client. To demonstrate the distinct value of occupational therapy, we need a measurement paradigm that is client centered. Dr. Velozo offers four major components to this measurement paradigm shift: 1) individualize measurement by presenting only the most relevant items/questions to the client, 2) validate/challenge existing theories through analysis of the relative difficulty of instrument items, 3) communicate across our measures through linking instruments, and 4) generate measurement outputs to inform occupational therapy daily practice. Dr. Velozo’s Eleanor Clarke Slagle lecture will inspire occupational therapy practitioners to demonstrate the distinct value of occupational therapy through using measures that address the needs of individual clients.
30 Pre-Conference Institutes & Seminars

16 Exhibitor Sponsored Seminars
46 Scientific Research Panels
301 1.5-Hour Short Courses

61 3-Hour Workshops
1,500+ Posters
49 Technology-Focused Sessions
18 Student Sessions

Primary Categories Represented
- Academic Education
- Children & Youth
- Developmental Disabilities
- General & Professional Issues
- Home & Community Health
- Mental Health
- Productive Aging
- Rehabilitation & Disability
- Sensory Integration & Processing
- Work & Industry
- Assessment & Measurement
- Prevention & Intervention
- Translational Research
- Basic Research
- Health Services Research
Pre-Conference Institutes & Seminars

**Academic Education (Fieldwork)**

Institute 004
Moving Toward Vision 2025: Promoting Diversity, Equity, and Inclusion in Occupational Therapy Academic Programs
This institute will provide attendees with the knowledge and skills needed to develop a comprehensive plan for enhancing diversity, inclusion, and equity in their academic programs. Participants will develop a strategic plan for recruitment, admissions, and curriculum design using case examples from multiple academic programs.

Institute 026
Linking Pedagogy and Practice: Implementing Meaningful Interprofessional Learning Experiences to Shape Strong, Enduring Behaviors for Practice
Interprofessional education optimizes health care professionals' knowledge and skills for effective team-based practice and quality client-centered care. This interactive institute, facilitated by interprofessional educators and clinicians, will provide participants with opportunities to explore evidence, resources, challenges, and best practices in interprofessional education.

**Seminar 001**
(AOTA) Becoming an Academic Fieldwork Coordinator
Fieldwork education is a crucial part of professional preparation and serves as the link between classroom and clinic. The purpose of this seminar is to provide a comprehensive orientation to academic fieldwork coordination. Opportunities to interact with experienced fieldwork coordinators will be provided. Resources to support the fieldwork program will be identified and explored.

**Seminar 002**
(AOTA) Changing Practice Settings: Becoming an OT Educator
This seminar will provide insight as well as the necessary tools for practitioners who either have made the transition or are thinking of transitioning to academia. This includes creating a faculty development plan, identifying resources to enhance teaching, and assessing student learning.

**Children & Youth**

Institute 002 (8:00 am–5:30 pm)
What’s Wrong With Lauren? Youth Mental Health First Aid: A Program for Adults Assisting Young People
Occupational therapy practitioners must equip themselves with current knowledge and beliefs regarding how to prevent, recognize, and effectively respond to psychological distress in youth. Improving mental health literacy in professionals who interact with young persons is vital as the youth may be unlikely or unable to understand, or act to seek assistance for the troubling concern. Youth Mental Health First Aid is an evidence-based educational program to meet this need.

Institute 013
Is it Sensory or is it Behavior? Analyze and Design Treatment Programs That Maximize Participation in Individuals With Complex Behaviors
This interactive institute will provide participants with a system for analyzing problematic behavior(s) that interfere with participation; sort out sensory-based problems from other causes; and prioritize and design intervention programs that address underlying sensory, motor, communication, or behavioral issues. We will use strategies from ABA, OTPF, and education to design programs to meet the individual's underlying needs and improve participation.

Institute 014
Postsecondary Transition Planning and Occupational Therapy: A Framework for Occupational Therapy Impact Across the School Years
Occupational therapy (OT) has an important role in preparing students across the school years for transition to adulthood. An AOTA Transition Workgroup presentation connecting postsecondary transition planning (PSTP) and OT will be shared that identifies key roles and resources designed to increase OT’s role and advocacy efforts.

Institute 015
So You Want to Break Into the Neonatal Intensive Care Unit (NICU)? Preparing for an Advanced Setting When You Cannot Get Experience
This institute will provide information on how to begin practice in a NICU. Participants will receive basic information regarding the skills and theory necessary for entry-level NICU practice; information about preterm development; diagnoses of ill neonates; trajectories of NICU graduates; infants’ post-discharge needs; and why OT is well-suited for the NICU.

**General & Professional Issues**

Institute 001 (8:00 am–5:30 pm)
(AOTF) Manuscript Writing and Reviewing Academy
To publish in journals, writers must write effectively and understand the processes of peer review and revision. Reviewers must understand the content, methods, and process necessary for evaluating manuscript quality. In this institute, OTJR Editorial Board members will lead an intensive hands-on program on effective manuscript writing, revising, and reviewing, via presentation, facilitated discussion, and active learning opportunities.

Institute 009
Starting a Private Practice: A Niche Market Approach
This institute is for practitioners who have a desire to create a private practice in their area of practice (niche) or to improve their current practice. This institute will discuss the principles of niche practice development and marketing by two presenters who are niche practice owners.
Institute 011
Applying Trauma-Informed Care Across Occupational Therapy Practice, Administrative, and Academic Areas
In 2003, trauma-informed care (TIC) became a federal mandate for mental health care. This interactive institute will provide best practice resources, lab sessions, and case examples to support OT curriculum design, organizational strategic planning, and direct OT service provision incorporating TIC within these respective practice areas.

Institute 012
(AOTA) Coding and Billing Boot Camp for Occupational Therapy
Boot Camp is an interactive experience that will provide attendees with the tools to successfully navigate various aspects of coding, documentation, and billing for both government and private payers including in-depth, real life instructions and examples. Attendees will leave with a toolkit that includes coding and credentialing information, documentation examples, and sample appeal letters.

Institute 027
Reiki, A Complementary Health Modality Used With Occupational Therapy, Level I, Certificate Provided
Reiki reduces pain and stress, enhances relaxation, and promotes healing during client-centered treatment. Reiki incorporated into OT can improve a client's occupational performance. Attunement to Reiki energy, hand positions, experiential practice, billing, marketing, research, and extensive OT resources and references will be provided. Participants will be presented with a Reiki Level I certificate.

Institute 008
Implementing Occupation-Based Interventions in Community-Based Mental and Behavioral Health Settings
During this institute, presenters will discuss their work with veterans, adolescents and parents of adolescents in addiction recovery, and a community mental and behavioral health center. They will describe their use of theater-based intervention, narrative medicine, and occupation to empower people in recovery to enhance their life participation and wellness.

Institute 010
Occupational Therapy and Homelessness: Enhancing Skills for Advanced Practice
This institute will use the Person-Environment-Occupation (PEO) model as a framework to explore relevant research and evidence-informed strategies related to supporting homeless persons in a variety of sociocultural contexts. Participants will be provided with resources for practice, which can be used to guide evaluation and research efforts.

Institute 005
Neuropsychiatric Symptoms of Dementia: Expanding Your Toolkit and Leading Your Team
Neuropsychiatric symptoms, such as agitation, are a core feature of dementia and problematic to manage. They can be addressed through nonpharmacological means, yet caregivers often lack training. OT practitioners are uniquely qualified to work effectively with people living with dementia and their care providers, and lead the team in building strategies to guide behavioral responses.

Institute 006
Exploring the Experience of the Built Environment for an Older Adult With Vision Loss
This interactive institute will provide advanced concepts in the area of environmental audit. Participants will experience immersion into the built environment, as experienced by older adults with vision loss, and then reflect upon that experience as they explore evaluation and intervention strategies to increase visibility and promote occupational participation.

Institute 003
Virtual Reality Immersion Lab: Therapeutic Use of Virtual Reality in OT
Although desktop virtual reality is commonplace in research and clinics, immersive virtual reality is just beginning to find its way into mainstream OT. In this hands-on institute, participants will learn to evaluate and adapt four commercial immersive virtual reality systems and integrate their use with evidence-based treatment strategies for occupation-based goals.

Institute 007
An Introduction to Sensory-Enhanced Yoga® for Self-Regulation & Trauma Healing
Sensory-Enhanced Yoga® synthesizes evidence from the fields of occupational therapy, trauma psychology, neuroscience, and Eastern yogic philosophy to produce a Transdisciplinary Model for Post-Traumatic Growth for healing symptoms of trauma or related autonomic nervous system (ANS) conditions. This institute will present the underlying science, theory, and guidelines of Sensory-Enhanced Yoga, as well as teaching labs featuring chair and standing yoga forms/movements, breath work, and sensory-based meditation practices.

Institute 004
Interventions in Community-Based Mental and Behavioral Health Settings
Topics discussed will include diagnosis, side effects of surgery, radiation and chemotherapy, occupational performance, lymphedema management, support for swallowing and trismus difficulties, musculoskeletal dysfunction, balance, and vestibular concerns, along with the introduction of demoralization.

Institute 009
Physical Agent Technologies: An Evidence-Based Occupational Framework for Assessment and Clinical Application
The use of physical agent modalities as an adjunct to clinical intervention strategies can enhance and expedite client outcomes. This institute will use a lecture/lab format to facilitate clinical reasoning using an evidence-based occupational framework for therapeutic selection and clinical application of physical agents to facilitate the safe and efficacious use of PAMs as a component of therapeutic intervention.
Institute 020
Fall Prevention Through Function: Reducing Fall Risk Through Dance, Tai Chi, and Occupation
Take your fall prevention skills to a new level through an occupation-based approach to assessment and rehabilitation of postural stability. Participants will learn about the impact of postural stability on occupation; understand how to apply activity analysis, evidence-based assessment, and a proposed Functional Balance Scale to determine occupational fall risk.

Institute 021
Assessing and Incorporating Community Accessibility Into Occupational Therapy Curricula
In this institute, participants will learn about the history, significance, and methods for evaluating the accessibility of community buildings. Through hands-on participation, attendees will learn how to evaluate and compare instruments that address the accessibility of community environments, including checklists and high-tech mobile app formats. iPads & smart devices are recommended.

Institute 022
Occupational Therapy’s Role in Chronic Pain Management: Why We Do It, and How We Do It
In this institute, participants will follow clients through the occupational therapy process of being treated for chronic pain. We will include evaluation, intervention, and discharge. Techniques specific to occupational therapy practice in chronic pain will be learned and applied during the practical portion of the institute. Upon conclusion, participants will feel empowered and prepared to treat clients dealing with chronic pain in any clinical setting.

Institute 023
From Impairment to Participation: A New Technique to Use the Fugl-Meyer Assessment to Inform Occupation-Based Intervention
The Fugl-Meyer Assessment (FMA) is a common assessment of motor impairment post-stroke, but because impairment does not directly translate to occupation, the FMA does not easily inform care planning or occupational therapy. This institute will train attendees to administer the FMA-UE, compare the item results to the patient’s ability, and identify tasks from a manual that meet their ability level or from the patient’s meaningful activities to create customized tasks ideal for repetitive task-practice.

Institute 024
Navigating Visual Dysfunction Post-Concussion: Enhancing Occupational Performance
Visual dysfunction following a concussion is highly prevalent, and can have a significant impact on occupational participation and performance. Symptoms such as headaches, visual disturbances, and light sensitivity can result in functional deficits related to reading ability, computer use, and participation within community-level tasks. Through the use of case examples, evidence, and hands-on practice, participants will strengthen their skills to effectively work in this emerging area of practice.

Institute 028 (2:00 pm–5:00 pm)
Custom Orthotic Fabrication: How to Choose the Right Orthosis
Orthosis is often fabricated by the occupational therapist for many types of injuries/medical conditions. It is used to provide protection and support, manage pain, and decrease inflammation and edema. Understanding which orthosis is appropriate, how to choose the correct material, and how to fabricate it will help promote tissue healing so the therapist can progress the client in the therapy process and achieve the goals set.

Sensory Integration & Processing
Institute 016
The Structured Observations of Sensory Integration–Motor (SOSI-M): Administration, Interpretation, and Bridging Your Findings to Clinical Practice
This hands-on training institute will provide an opportunity to learn to administer, score, and interpret the Structured Observations of Sensory Integration–Motor and connect results to treatment planning and sensory integration intervention. SOSI-M is a new nationally standardized assessment based in Ayres clinical observation.

Work & Industry
Institute 025
Advancing OT Skill Sets to Promote Work Participation Across Settings: Job Analysis, Ergonomics and Evidence-Based Interventions
In this interactive course, participants will learn how to complete job analyses/ergonomic assessments, explore interventions including ergonomic equipment and job modifications, consider relevant legislation and employer factors, and create evidence-based, client centered intervention plans.
## Registration, Hotel, & Travel

### 3 Ways to Register

**Online & Mail:** Visit [www.aota.org/conference](http://www.aota.org/conference) to register or obtain a mail-in form.

**Telephone:** Call 800-729-2682, 9:00 am–5:00 pm EST, Monday–Friday.

**Housing Deadline is Wednesday, February 26, 2020**

Reserving a room in the AOTA room block is an important way to support the Association and ultimately keep overall meeting costs as low as possible. To receive AOTA’s discounted rates, room reservations must be made through ConferenceDirect Housing. Individual hotels will not accept reservations at our group rate through any other method. Hotel reservations may be made online by visiting [www.aota.org](http://www.aota.org). You will find the list of Conference hotels and policies on the site.

### Housing Alert! Beware of Housing Pirating Companies

AOTA has approved ConferenceDirect Housing to coordinate all hotel reservation requests for the 2020 AOTA Annual Conference & Expo. If you are contacted by any housing company other than ConferenceDirect Housing, recognize that they are not endorsed by AOTA and, despite their claims, they do not have access to our negotiated discounted rates. AOTA Housing does not initiate calls to sell sleeping rooms and under no circumstances is a full non-refundable payment required at time of reservation.

### Conference Hotel Shuttle Service

Shuttle service will be provided Wednesday, March 25, 2020 through Sunday, March 29, 2020. Routes and boarding locations are subject to change at any time without notice. Attendees should check the sign in their hotel lobby and the shuttle flyer once onsite for the most current information. For more information regarding routes and boarding locations visit [www.aota.org](http://www.aota.org). New! Get real-time shuttle information through the AOTA Conference app.

### Travel Information

The Boston Logan International Airport (BOS) serves the Boston area and is located 5 miles from the Boston Convention and Exhibition Center (BCEC), host of the 2020 Conference.

**Airline Discounts**

**Delta Air Lines**

You may book at [www.delta.com](http://www.delta.com) or call Delta Meeting Network* at 1-800-328-1111* Monday–Friday, 7:00 am–7:30 pm (CT) and refer to Meeting Event Code NMTSH.

*Please note there is no service fee for reservations booked and ticketed via the reservation 800 number.

**American Airlines**

You can book online at [www.aa.com](http://www.aa.com). Please enter 5730DZ as the promo code on the Passenger Details page. For assistance with reservations and ticket purchase, you can also contact the American Airlines Meeting Services Desk at 1-800-433-1790.
